The Value of Secure Access Service Edge (SASE)

INCREASED SECURITY COMPLEXITY

59%

of organizations say cybersecurity is more difficult than it was 2 years ago¹

41%

have seen an increase in remote workers accessing the network and applications¹

47%

of enterprises use tools from 11 or more security vendors¹

45%

say managing multiple security products strains their resources¹

Symantec's industry-leading Secure Access Service Edge (SASE) solution is a convergence of technology that delivers network protection, keeping data secure wherever it lives, all the way to your remote workforce.

SYMANTEC SASE HELPS OVERCOME SECURITY CHALLENGES

ESG found that many organizations experience the following network security problems:

44%

Inconsistent management across physical and cloud or virtual environments²

42%

Performance issues that negatively impact user experience²

36%

Too many disparate network security tools from multiple vendors²

33%

Difficulty implementing new network security solutions²

25%

Lack of scalability²

Symantec SASE combines Network Protection with DLP Cloud to meet these security challenges.

AGENCY IMPACT OF SASE

According to Tolly Group:

Symantec DLP provides ready-made templates and policies that cover PII, PCI, and HIPAA³

Symantec web filtering categorizes URLs into 80 categories that include 12 different security categories³

Symantec Cloud Access Security Broker (CASB) can recognize over 45,000 different cloud apps³

Symantec SASE allows your agency to leverage all the elements outlined in the Gartner framework and data awareness capabilities beyond the Gartner framework using an open solution that is compatible with any SD-WAN.

COMPONENTS OF SYMANTEC SASE

Symantec SASE includes:

Secure Web Gateway (SWG)

Cloud Access Security Broker (CASB)

Cloud Data Loss Prevention (DLP)

Zero Trust Network Access (ZTNA)

URL Threat Prevention & Classification

Deep File Inspection & Sandboxing

Cloud Firewall Service

Remote Browser Isolation

When users adopt Symantec SASE, they benefit from:

Deep visibility into user activity across 1,000s of applications

Web filtering services that categorize billions of URLs into 80+ predefined categories

A COMPLETE SASE SOLUTION

“The Tolly analysis showed that the Symantec web security portfolio provides solutions within each of Gartner’s SASE categories and provides services beyond the Gartner main components.”

- Tolly Group Analyst Brief: Symantec Secure Access Service Edge (SASE) Portfolio Comparison to Gartner SASE Framework

SYMANTEC SECURE ACCESS SERVICE EDGE (SASE)

Symantec SASE delivers value by:

Protecting remote workers to the edge of the network

Meeting network security challenges

Providing all the security components of a complete SASE solution
