

Simple Seamless Accessibility

## Allyant Overview:

Allyant is the world's first comprehensive accessibility solutions company. The combination of three globally recognized accessibility solutions companies, including CommonLook, Accessible360, and T-Base Communications. We make accessibility simple, seamless, and efficient for organizations—ensuring equitable access to digital, document, and printed information for people with disabilities. With over 350 employees, the company offers a multitude of accessibility services and software solutions, spanning print and digital document remediation services, document remediation software, and digital accessibility auditing. The most prominent organizations in the world, including those in government, healthcare, education, and financial services rely on Allyant's solutions to create, assess, remediate, produce, and track accessible, compliant communications efficiently and cost-effectively.

## Why Allyant?

Allyant is truly a one stop shop for accessibility compliance.

- Website Accessibility Manual Audits and Scanning Tools.
- CommonLook Document Accessibility Software tools and professional document remediation services.
- Alternative formats such as Braille and Large Print, all provided in our secure HIPAA, SOC2 and PCI compliance facilities.

At the HIMSS 2025 conference, Allyant will be showcasing our unique services for the healthcare industry.

- **Professional Remediation Services:** To ensure compliance with the latest HHS requirements for accessible communications, Allyant has a large team of remediators for manual remediation of any document. Allyant provides guaranteed compliance to the standards with a rapid turn around for many healthcare insurance providers.
- **Automated Remediation Services:** Allyant has software tools and services available for high volume remediation of template-based documents for handling millions of documents annually.
- **Alternative Format Services:** Allyant can provide Braille and Large Print for healthcare clients in our secure datacenters located in the U.S. and Canada.
