

RSA Security Offer to Federal Government Purchase Guide

To receive pricing and/or to schedule an overview reach out to:
RSA@carahsoft.com or (888) 662-2724

Federal Government agencies face growing identity-based threats as access extends across cloud platforms, remote users, and third-party systems. RSA enables agencies to strengthen authentication and reduce access risk while maintaining usability and compliance. Through Carahsoft, agencies can engage with RSA to review their current identity approach and explore practical ways to improve security and resilience.

RSA's Solutions for Federal Public Sector Organizations

- **FedRAMP-authorized:** Accelerate cloud migrations and modernize your infrastructure with RSA IDPlus for Government, a FedRAMP-authorized IAM solution that satisfies 325 security and privacy controls based on the NIST 800-53 framework and meets requirements for continuous reporting
- **O365 GCC High integrations:** RSA integrates with O365 GCC High through Microsoft's External Authentication Methods (EAM) to secure customers' access to sensitive Microsoft resources
- **U.S. Citizen / U.S. Soil:** Agencies have the option to purchase and receive support from U.S. Citizens on U.S. soil.

RSA's Solutions for Federal Public Sector Organizations

Cloud, Hybrid, or On-premises authentication: RSA ID Plus provides flexible deployment options to meet organizational high availability and security needs.

- **Cross-environment support:** RSA ID Plus can support users across cloud, hybrid, and on-premises environments and provides on-premises failover to ensure authentication and access even during cloud outages.
- **Versatile:** Compatible with both legacy and modern systems, providing broad support for all agency applications.
- **Accelerates Passwordless End-User Experience with mobile and hardware options. Phishing-resistant Mobile Authenticator:** FIDO2 (mobile) provides strong, phishing-resistant authentication, protecting government systems from credential-based attacks.
- **Phishing-resistant, hardware authentication:** The RSA iShield Key 2 Series is an AAL3 & FIDO2 hardware authenticator that meets federal cybersecurity requirements for phishing-resistant passwordless authentication.
 - **Deploys a FIPS 140-3 level 3** certified cryptographic module (certificate 4679)
 - **Deploys field-upgradable firmware Smart card functionality:** PIV support offers secure, tamper-resistant storage for digital certificates and credentials. (NFC and MiFare models available)
