

# Simply Application Security and Delivery Across Hybrid Environments

Thank you for your interest  
in exploring this content.

Carahsoft is the **Trusted Government IT Solutions Provider**®  
supporting a broad portfolio of industry-leading technologies  
and a wide range of contract vehicles.

As the **Master Government Aggregator**®, Carahsoft connects  
government agencies, industry partners, and technology  
providers to deliver innovative, mission-focused solutions.

In partnership with F5, we provide technology solutions that  
drive modernization, strengthen operations, and ensure  
compliance with evolving government standards.

# Simplify Application Security and Delivery Across Hybrid Environments

Increases in no-code and AI-generated code tools mean that software and applications are being developed faster than ever.

## > 1 Billion

By 2028, over a billion net-new applications will be created<sup>1</sup>

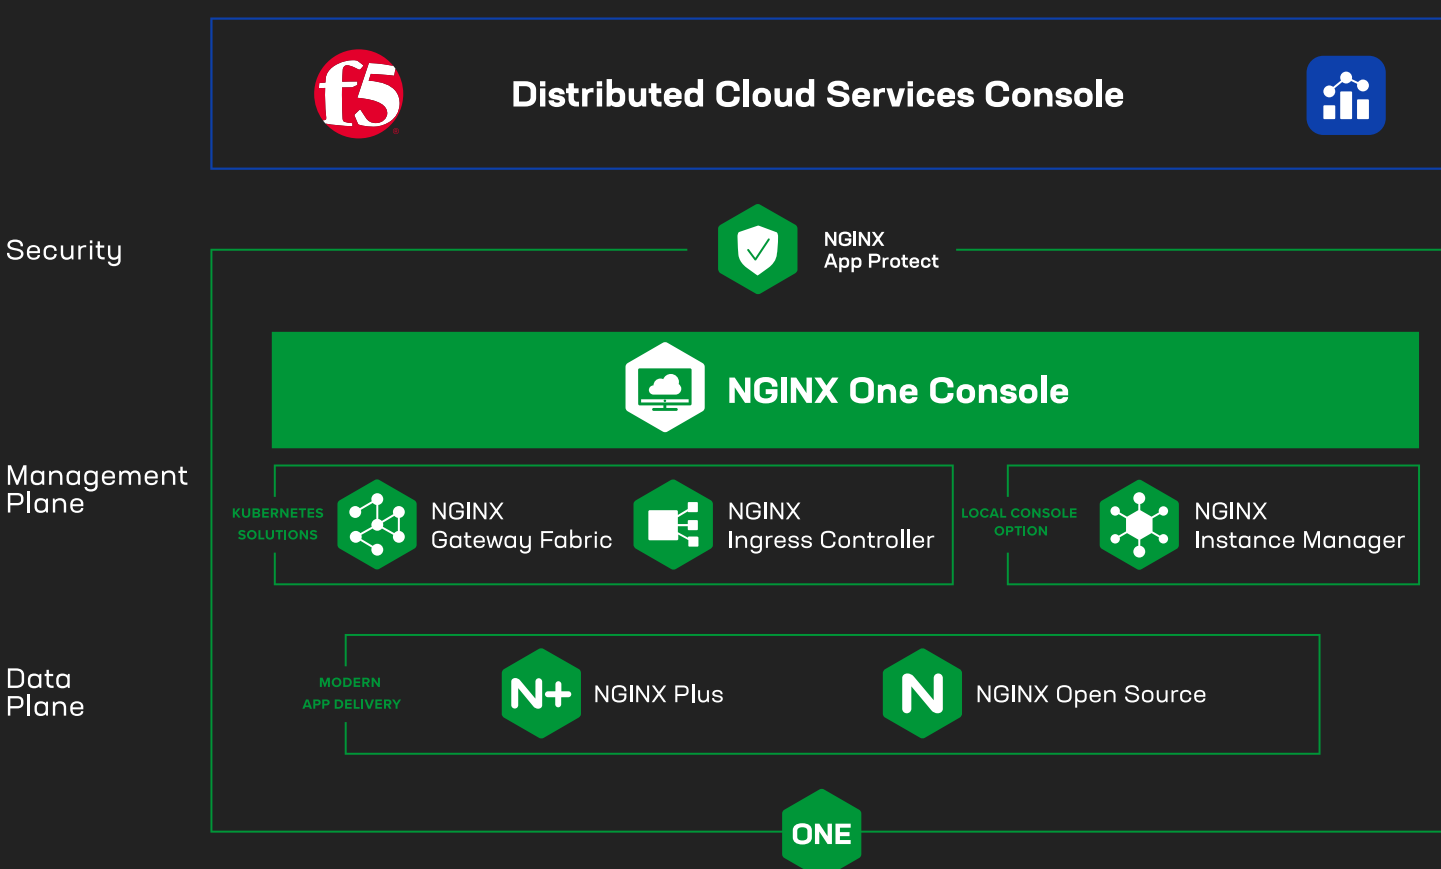

With 88% of organizations operating hybrid deployment models<sup>2</sup> for hundreds or even thousands of apps, stakeholder alignment becomes a challenge, leading to:

Too many tools to manage	Inconsistent security policies	App performance issues	Significant visibility gaps	Procurement issues

Modern applications that rely on APIs, Kubernetes, and AI model inference need a new kind of solution.

## Optimize, secure, and scale your modern apps with F5® NGINX One™

Get access to the entire ecosystem of proven NGINX technology streamlined for the next generation of apps.

NGINX is used by a third of all websites and nearly half of organizations using containers. NGINX One makes it easier to securely deliver apps across diverse environments.

### Streamlined management

- Single console for all NGINX instances, accessible via API or SaaS
- End-to-end visibility for key stakeholders
- Centralized policy management
- Integration with F5® Distributed Cloud Services for security and scale

### Increased availability and performance

- Dynamic load balancing and high availability
- Real-time performance metrics
- Automated configuration and updates

### Enhanced security

- Vulnerability and misconfiguration detection
- Security and compliance monitoring
- WAF and denial-of-service protection options

### Simplified procurement

- Single license agreement for all NGINX products
- Flexible component mixing and consumption options
- One product for app, API, and Kubernetes optimization

Transform application delivery across diverse environments with a solution that makes it easier to buy, manage, observe, optimize, and govern NGINX components. [Partner Name] can help build the right NGINX One solution for you. Visit us to learn more: [partner URL].
