In support of the GSA OneGov Strategy, Google and GSA have expanded the OneGov collaboration to introduce cost savings on cyber security solutions. The third phase of the OneGov agreement now provides federal agencies with Google Cloud's security solutions at **discounts of up to 65%**.

The agreement covers a comprehensive suite of Cloud security tools designed to enhance agency risk profiles, including Google Security Operations, Google Threat Intelligence, Chrome Enterprise Premium, Google Security Command Center, Mandiant Threat Defense and Google Unified Security. These solutions leverage AI and Google's massive scale to accelerate threat detection and response. The portfolio's interoperable design ensures agencies can easily integrate these solutions into their current stacks, providing the flexibility to address unique security challenges.

Google Security Products offered as part of the Promotion:

Products	Capabilities	Discount
Google SecOps	The Google SecOps SKU is a subscription-based offering available in Enterprise and Enterprise Plus tiers that provides unified SIEM and SOAR capabilities to detect, investigate, and respond to cyber threats. It is priced primarily based on the volume of data ingested ($/GB) over the length of the contract term.	65%
Google Threat Intelligence (GTI)	The Google Threat Intelligence (GTI) SKU is a subscription offering available in Enterprise and Enterprise Plus tiers that combines Mandiant frontline expertise, VirusTotal's global community, and Google security telemetry into a single platform. It provides organizations with comprehensive visibility, context, and actionable insights to proactively detect, manage, and respond to cyber threats and external exposures.	50%
Google Unified Security (GUS)	The Google Unified Security (GUS) SKU is a comprehensive, single per-gigabyte ingestion package that bundles Google Security Operations (Enterprise+), Google Threat Intelligence (Enterprise+), Security Command Center (Enterprise), Chrome Enterprise Premium, and Mandiant expertise. It provides end-to-end security coverage and simplifies procurement by offering unified detection, investigation, response, and cloud protection capabilities with predictable pricing.	65%

Products	Capabilities	Discount
Expertise on Demand (EOD)	The Mandiant Expertise on Demand (EOD) SKU is a flexible, annual subscription that provides organizations with prepaid units redeemable for Mandiant consulting, training, and threat intelligence services. It acts as both a flexible consumption model and an incident response retainer, allowing customers to easily augment their security operations with Mandiant's frontline experts on demand. **Service Inclusion:** Expertise On Demand (GSI-EOD-ENT-BASE) with a 100% discount is considered part of a bundled offering and is only available in conjunction with the purchase of CS-GSI-EOD-2H-SLA and/or CS-GSI-EOD-UNIT. It is not provided as a free, standalone product.	**EOD Units** 35% **IR 2hr SLA EOD** 55% **EOD Base Subscription** 100%
Security Command Center Premium (SCC-P)	The Security Command Center Premium (SCCP) SKU is a security offering for Google Cloud that provides advanced threat detection, attack path simulations, and security posture and compliance management. It is available via both fixed-price subscription and Pay-As-You-Go (PAYG) models based on the consumption of Google Cloud resources.	40%
Chrome Enterprise Premium (CEP)	The Chrome Enterprise Premium (CEP) SKU is a secure enterprise browsing subscription offering priced per user per month. It provides advanced data protection (DLP), malware and phishing prevention, and context-aware access controls directly within the Chrome browser to enable Zero Trust application access and protect corporate data.	65%
Mandiant Security Validation (MSV)	The Mandiant Security Validation (MSV) SKU is an automated platform that continuously and safely emulates real-world attacks to quantify and test the efficacy of an organization's security controls. It pinpoints misconfigurations and detection gaps to maximize the return on security investments, typically licensed as a package comprising a central Director and multiple supporting node Actors. **Mandiant Security Validation**: MSV Base must be sold and licensed together with MSV Actors. Each license for MSV Base requires that five (5) MSV Actors be purchased as part of a single, inseparable bundle. The identified MSV Actors SKU cannot be purchased as a stand-alone product. However, additional MSV Actors (V-ACTOR-MA) licenses, beyond those bundled with MSV Base, can be purchased at the current list price.	**MSV Director** 55% **MSV Actor** 100%
Advanced Intelligence Access (AIA)	**Advanced Intelligence Access (AIA):** This premium subscription provides a dedicated, full-time, embedded Mandiant analyst to help organizations integrate raw threat intelligence backend data, perform bespoke research, and build customized security strategies.	30%
Essential Intelligence Access (EIA)	**Essential Intelligence Access (EIA):** This flexible subscription provides part-time, targeted analyst expertise and scalable access to Mandiant threat intelligence, bundling capabilities like digital risk monitoring, custom inquiries, and credential monitoring into one package.	45%

Frequently Asked Questions

Where to Purchase:

- The offerings are available on the GSA Schedule Contract 47QSWA18D008F and Google Mandiant DoW ESI BPA N66001-21-A-0031.
