Multiple simultaneous screen sharing in Microsoft Teams meetings for increased productivity and streamlined collaboration

Remote and hybrid work should benefit your team—no matter the industry—by maintaining the same in-office-level of productivity and connectivity.

### **Remote and distributed work is here to stay**

Reap the benefits of remote and hybrid work models without leadership feeling like they've lost pulse of the business.

### **Make it easy to stay collaborative from anywhere**

Equip your team with tools that reduce friction and increase connectivity.

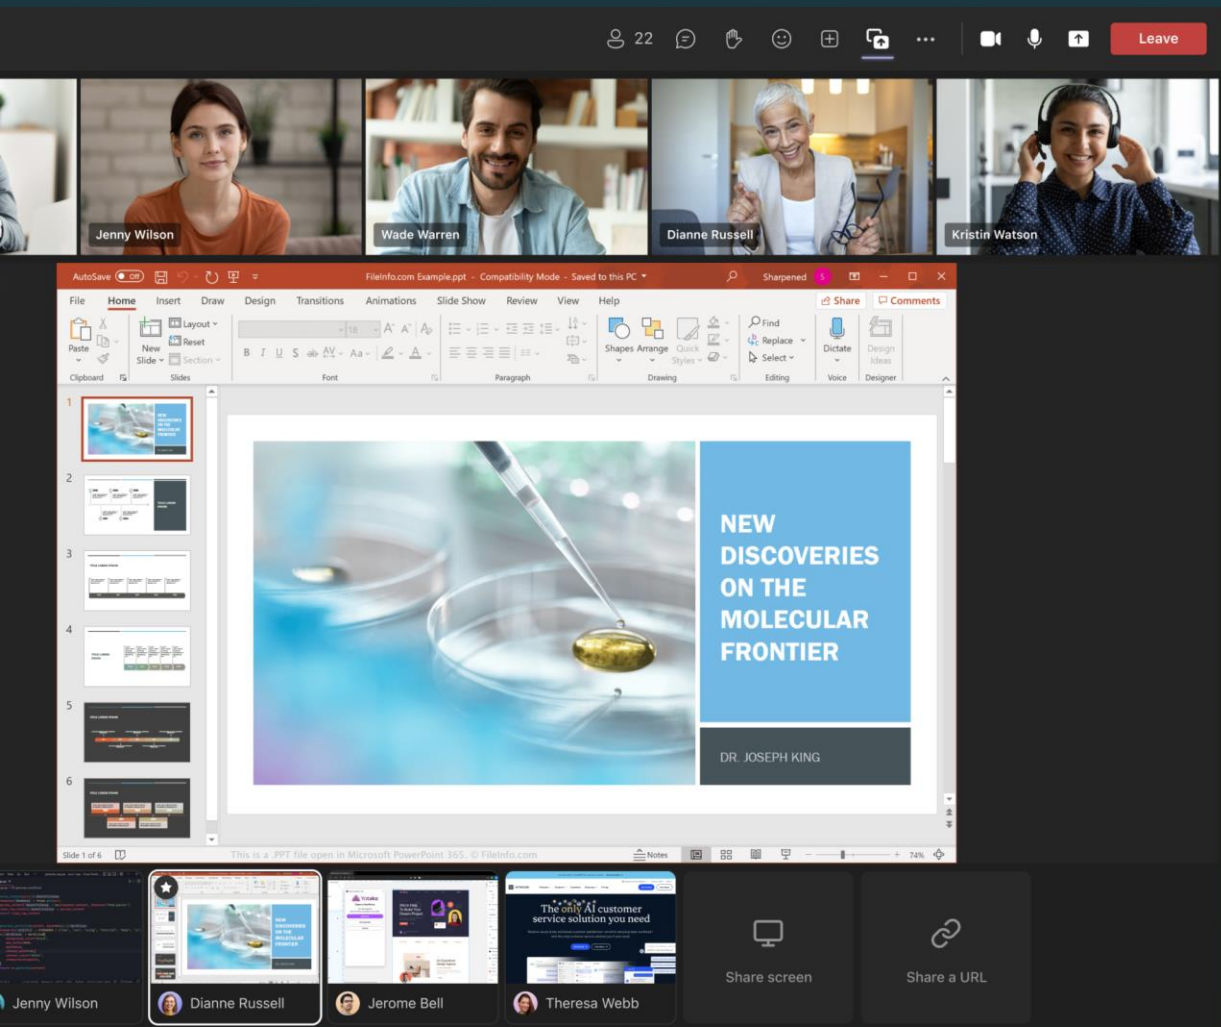

### **Break down barriers to success**

Empower your team and build continued trust while increasing productivity and job satisfaction.

Unlock your team's full collaborative potential and work together naturally with multiple simultaneous screen sharing in Microsoft Teams meetings.

Up to 15 users can share their screens at once, making group projects and working sessions more collaborative.

Independent toggling means users can follow along at their own pace or go back to view other screens without disrupting the flow of the call.

Lead a call or training session with the ability to check on other's progress by having them share their screen back to you so everyone can stay on track.

### **Multi-user screen sharing in all of your calls**

Multiple people can share their screens simultaneously in Teams—up to 15 at once. Spotlight any screen at any time to center the conversation and stay on track.

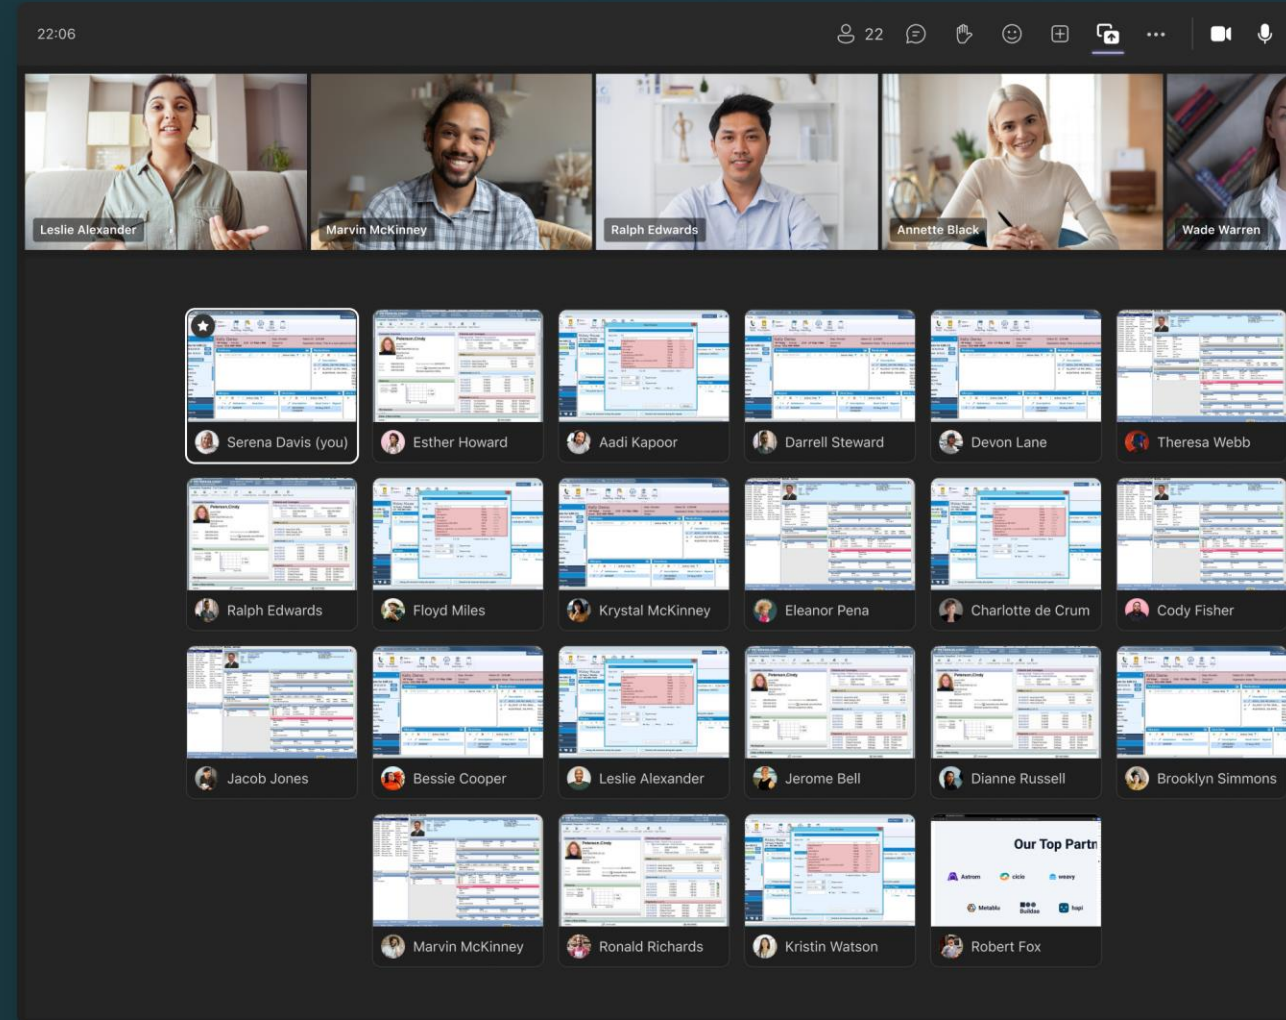

### **Meetings as flexible as your team**

Perfect for brainstorming and co-working sessions that make it feel like you're sitting side by side no matter where you are calling in from.

### **Grow your productivity**

No more passing the screen share permission back and forth. More efficient meetings means more time for getting things done.

# MultiShare for Microsoft Teams

### **A new way to drive meeting engagement**

It's easier to stay engaged when you don't have to worry about stealing the spotlight or interrupting those speaking to start participating.

### **Accelerated collaboration**

Meetings move faster when there is less technological friction and more time spent on what matters to your team.

### **Reach your full potential**

When everyone can share the sky is the limit. Reimagine how in-call productivity can look for your team no matter if they are down the hall or on the other side of the globe.

Transform your  
in-call productivity,  
get started with  
MultiShare today
