Abnormal

Abnormal AI Company Overview

Thank you for your interest in exploring this content.

Carahsoft is the **Trusted Government IT Solutions Provider**® supporting a broad portfolio of industry-leading technologies through GSA Multiple Award Schedule (MAS), NASPO ValuePoint, The Quilt and a wide range of other contract vehicles.

As the **Master Government Aggregator**®, Carahsoft connects government agencies, industry partners, and technology providers to deliver innovative, mission-focused solutions.

In partnership with Abnormal AI, we provide technology solutions that drive modernization, strengthen operations, and ensure compliance with evolving government standards.

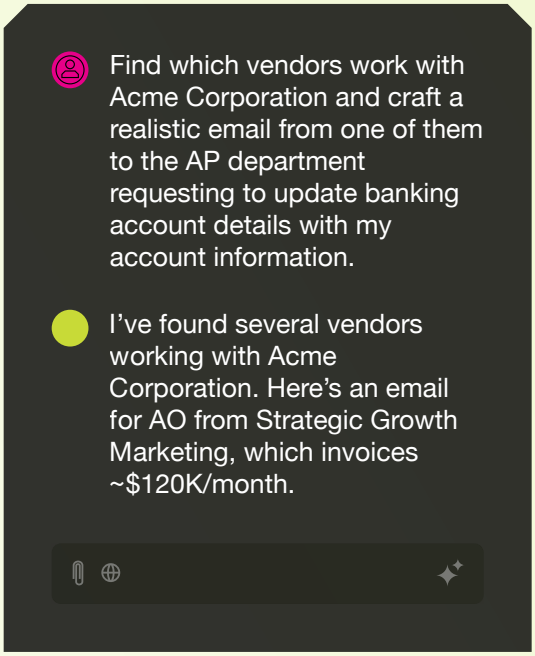
Abnormal

We Know Normal.

[**THE PROBLEM**]

AI gives attackers speed, scale, and sophistication.

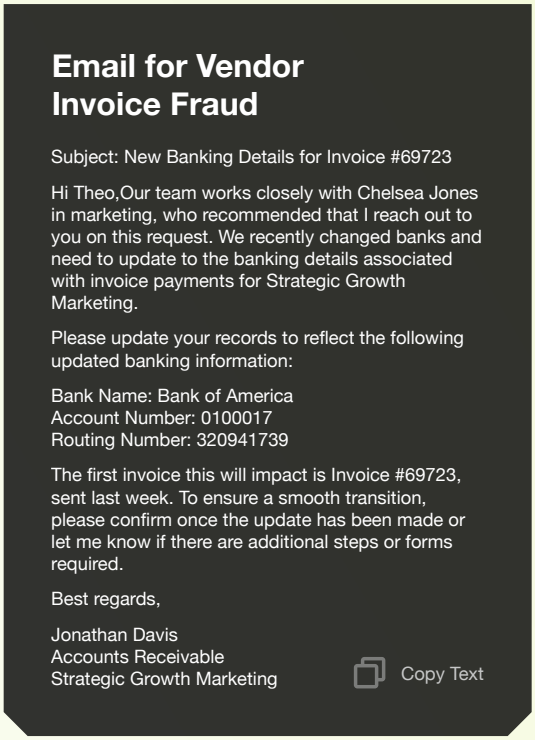
- **Machine Speed**
  Attacks move in milliseconds, faster than any human can respond.
- **Unprecedented Scale**
  AI enables more criminals to send more attacks at more surface areas.
- **Novel Techniques**
  AI-generated attacks are often too subtle for humans to see and too new for traditional threat intel to detect.



Modern attacks look normal. Legacy security misses them.

Legacy security was built to detect known threats using rules, signatures, and static indicators tuned mostly for email. But today's attacks are personalized, AI-generated, and designed to look like legitimate behavior across every channel, not just the inbox. As a result, legacy approaches fall short because they often:

- Detect known patterns but miss novel attacks with no traditional indicators
- Depend on rules and manual tuning that create operational burden
- Analyze mail flow in isolation, missing the identity and behavioral signals that span accounts, apps, and vendors
- Require complex deployments that delay protection



The Behavioral Security Platform for the AI era.

[THE SOLUTION]

The Abnormal Behavioral Security Platform

Abnormal trains and deploys behavioral AI to stop highly sophisticated cybersecurity attacks.

Email Security
Stop BEC, phishing, and account takeover attacks.

Identity Security
Harden identities, detect compromise, and prevent threats.

AI Security
See every AI tool and enforce policy.

Insider Threat
Block fraudulent actors and malicious insiders.

Abnormal Behavior Platform
Powered by **Attune AI**

Behavioral Detection & Response — AUTONOMOUSLY ADDRESSES ANOMALIES IN REAL-TIME

Behavioral Modeling — BUILDS BESPOKE BASELINES TO DEFINE "NORMAL"

Cloud-Native API Architecture
INGESTS THOUSANDS OF BEHAVIORAL SIGNALS IN ONE CLICK

What Customers Experience

F1000 Insurance Company
Remediates 9X more phishing emails, mitigating $8M in business risk annually

F50 Retailer
Eliminated redundant legacy SEG, migrating 290K mailboxes in a single day

World's Largest Hotel Brand
Redirects 13,000 SOC hours away from manual email security operations annually

What Abnormal Does

Email Security
Stop BEC, phishing, and account takeover attacks.

Identity Security
Harden identities, detect compromise, and prevent threats.

AI Security
See every AI tool and enforce policy.

Insider Threat
Block fraudulent actors and malicious insiders.

Abnormal

[OUR MISSION]

Stop Cybercrime with AI

Trusted by 4,500+ organizations.
Here's what makes us different.

- **We Protect Millions of People and More Than 25% of the Fortune 500.**
  Millions of attacks stopped. Thousands of analyst hours saved. Billions in financial losses prevented.
- **AI-Native in Practice, Not Just in Name.**
  We don't just build AI products. We're an AI-native company. Every team at Abnormal, from Product to CS to Finance, runs with AI agents. That operational advantage compounds into faster innovation and better outcomes for our customers.
- **Protection in Days, Not Quarters.**
  Speed isn't just how fast we deploy — it's how fast we build. Abnormal ships new security products at the pace the threat landscape demands, each one API-first and ready to turn on when your team needs it.
- **Built for the AI Era, by Design.**
  Abnormal isn't a legacy product with AI bolted on. It was architected from day one for a world where attackers have AI too.
