

Shared Vision. Outcome Assured.®

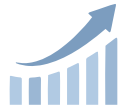

## Delivering Cutting-Edge Digital and Mission Solutions

SMX harnesses the transformative power of technology to achieve mission success as a leader in digital and mission solutions, specializing in secure and advanced cloud, cybersecurity, data and analytics, digital transformation, mission operations and intelligence, and modeling, simulation and training solutions. Operating in close proximity to our clients across the globe, the SMX team has a shared vision to deliver scalable and secure solutions to assure outcomes for the critical missions of our government and commercial clients. We share our clients' vision and strive to accelerate their impact on the world. We bring both cutting-edge technology and an expansive view of what is possible to every engagement.

Our goal is simple: to help you accomplish your mission. We engineer and integrate complex systems that make it easier for you to use data, automate processes, and take advantage of new capabilities — freeing you to focus on being more effective and competitive. Most of all, as a trusted partner with technology in our DNA, we deliver the right solution, no matter how unique or complex the environment.

## SMX ELEVATE™

### Accelerate Your Digital Transformation Journey

SMX is recognized as a leading provider of technical and business solutions for clients up and down the technology stack - from on-premises data center support through cloud adoption, data analytics, and application transformation and sustainment. Through our SMX ELEVATE framework and Intelligent Automation Platform (IAP) we design, build, operate, and secure multi-cloud platforms.

## ELEVATE ISR™

### A Breakthrough Commercial ISR Platform

The SMX Elevate ISR platform seamlessly links technology, data, and expertise. While some can deliver pieces of the solution, SMX can deliver a complete end-to-end capability. The Elevate ISR platform automates processes and outcomes at mission speed — extracting the greatest value from open source data. To learn more visit: [elevateisr.com](http://elevateisr.com)

### Cloud

SMX delivers full lifecycle cloud services - from strategy, migrations, and modernization through managed security and operations services. Our teams of highly accredited, multi-cloud experts, backed by our digital tools and proprietary IP help accelerate our clients' cloud journey.

### Cybersecurity

For more than 25 years, SMX has provided offensive and defensive cybersecurity solutions for DoD, civilian government, and commercial clients, with capabilities that deliver security and compliance in the most complex environments for critical global missions.

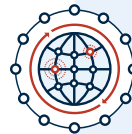

### Data & Analytics

SMX transforms enterprises of every description into data-centric powerhouses. With access to faster, more timely, and complete data, you can democratize the workforce, instill sustained workforce agility, and enable personnel to thrive.

### Digital Transformation

SMX delivers speed, scalability, security, and the ability to pivot instantly to meet any challenge or opportunity through digital transformation. Streamlined processes, smarter decisions, and stronger results, built on cloud-native ecosystems help our clients accomplish their missions.

### Mission Operations & Intelligence

For U.S. forces around the world, closing intelligence gaps is essential to assuring the mission, whether the goal is countering an adversary or delivering humanitarian aid. SMX has changed how C5ISR services are deployed and fielded globally - by air, land, sea, and space.

### Modeling, Simulation & Training

SMX provides state-of-the-art modeling and simulation tools and technology to provide clients with the most accurate and realistic simulations possible. Our comprehensive technology approach is tailorable to meet client needs and improves decision-making, reduces risk, and increases efficiency.

# Premier Contracting Vehicles

We have been awarded a multitude of premier and prime contracting vehicles, including **GSA ASTRO**, **GSA Alliant 2**, **GSA OASIS**, **GSA MAS IT**, **NITAAC CIO-SP3**, and **SeaPort-NxG** to name a few. This allows us to simplify and expedite large-scale acquisition and procurement processes to provide competitive, rapid, and agile solutions for our clients.

## Leading Technology Partners

SMX maintains professional partnerships with the most recognized technology industry leaders. A pioneer in cloud modernization, we successfully migrated the first Federal Government compute workload to the cloud. We are one of only a handful of companies worldwide that have achieved Premier status in all three hyperscaler cloud platforms, including Amazon Web Services, Microsoft® Azure, and Google Cloud.

## Highest Quality Standards

SMX is highly committed to quality assurance by enhancing client satisfaction, achieving continuous improvement, and exceeding international regulatory requirements. Our long-time philosophy: "Sustained excellence through continuous improvement," is the cornerstone upon which our Quality Management System (QMS) was established. We have successfully earned and maintained CMMI DEV 3 and SVC 3, ISO 9001, 20000, 27001, and AS9100D certifications.

## Industry Recognition

SMX has been globally recognized in the Gartner® Magic Quadrant™ for Public Cloud¹ for six consecutive years. In addition to receiving many prestigious awards as one of the fastest-growing technology companies, SMX also has earned repeat recognition as a 'Best Firm to Work For,' a 'Top Technology Firm,' and an 'Employer of Choice'. We have also received the James S. Cogswell Award, the most prestigious in the Industrial Security field.

## Client Mission Commitment

SMX is committed to ensuring the highest levels of client satisfaction, providing world-class solutions alongside our clients globally. We have maintained a reputation for delivering positive mission impact, supporting the critical missions of highly secure and highly regulated government organizations and highly recognized commercial organizations. Below are some of the leading industries we proudly serve.

### Global Footprint

Operating in close proximity with our clients across the globe in support of SOUTHCOM, AFRICOM, CENTCOM, EUCOM, INDOPACOM and many other critical mission areas.

- Department of Defense
- U.S. Intelligence Community
- Law Enforcement Agencies
- Federal Civilian Agencies
- State and Local Government
- Higher Education Institutions
- Nonprofit Organizations
- Other Fortune 1000 Companies

**SMX Culture & Careers** - Investing in our people has been the cornerstone of our success. We attract and retain the best and brightest with competitive benefits, excellent work environments, remote work alternatives, and growth opportunities for our employees while continuing to expand operations and support our communities. SMX also has many employee resource groups, leadership, and training programs available for employees to become part of the SMX community and build a long career at SMX. To learn more about the SMX culture and view our current career opportunities and apply, please visit: [www.smxtech.com/careers/](http://www.smxtech.com/careers/) or email [Talent@smxtech.com](mailto:Talent@smxtech.com).
