Raycom.

THE FUTURE OF SECURE AI-DRIVEN TACTICAL NETWORKS

Mission-Ready All-In-One Private 5G: Built for Real World Operations

Raycom's SHARK provides the Warfighter with locally controlled, secure, rapidly deployable, and interoperable communications, enabling resilient global operations with minimal personnel in secure or contested environments.

Raycom's SHARK – Your Complete C5/Tactical Communications Platform

- Ruggedized, portable, single deployable unit
- Independent, secure and high-power network
- Command, control and situational awareness
- Quick to deploy, easy to operate
- Multi-band, ready for global operations
- AI-driven, integrated edge compute & application platform

- Standalone, secure, zero-trust broadband private network
- Bringing agentic AI and real-time, critical information to the end user
- Single pane of glass designed for one-person operation
- Mission-ready to support mobilized teams

Introducing Raycom SHARK™

Integrated **Edge-Compute**, **Multi-Mode Sensing** and **Private 5G** in a Single Deployable Unit

Stand-Alone, High-Power, Agentic Radio Kit

A Rapidly Deployable Network Purpose-built for DoW, DHS & First Responders

SHARK is a self-contained, powerful, easy-to-operate network that serves multiple use cases & applications.

Situational Awareness and Sensing

- **ISAC (Integrated Sensing and Communication) – passive drone and object detection**
- Detection of location, frequency interference & adversaries
- Fusion of multiple active and passive sensing measures

UAS Operations

- Higher reliability, lower latency, stronger security
- Greater autonomy in contested environments
- Enables assured C2 for UAS tactical operations

Agentic AI & Local GPU Inferencing

- Autonomous operations - Self-healing & adaptive network
- Real-time 4K video analytics from UAS and sensors
- Object detection & threat identification at the edge
- Transmits actionable data – not raw data
- Unlimited, mission-critical communications and AI applications

Mission Built

- Ideal for DoW, DHS and first responders
- Rapidly deployable – less than ~10 minutes
- Standalone and multi-bubble operation
- Modular, Multiband Software Defined Radio
- High Power (2 x 10W), Multiple configurations
- Compute: 2 CPU + 1 Industrial GPU

Stay Connected. Stay Informed. Stay in Control Wherever Your Team Operates. *Because Failure Is Not an Option.*

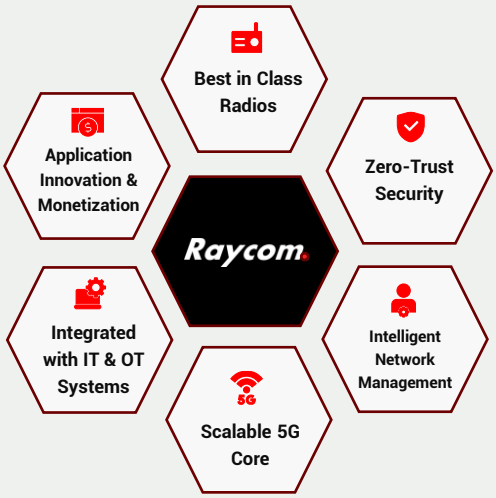

MISSION-CRITICAL COMMUNICATIONS

WHY CHOOSE RAYCOM?

A leader in *private 5G private network solutions,* Raycom provides the technological edge, AI and impact enhancing unified, secure communications. Raycom will address your needs in *advanced, private 5G network solutions.* Partner with Raycom to bring the future of smart, unified, reliable communications – *anywhere, anytime.*

Raycom.
