BlueVoyant C-SCRM: Supply Chain Cyber Mission Assurance

Stand up an end-to-end C-SCRM program with bundled discounts on supply chain risk assessment, monitoring, and remediation — available now through end of FY26!

Growing supply chain threats and evolving federal C-SCRM priorities are signaling the need for continuous supplier risk visibility. Agencies can no longer rely on periodic assessments or disconnected risk data to understand which supplier risks may affect mission outcomes — and, most importantly, what actions to take next.

BlueVoyant C-SCRM helps federal government agencies reduce risk and vulnerabilities in complex supply chain ecosystems — not just by identifying or scoring risk, but by validating and prioritizing active threats, delivering findings and action plans with original source data, and even confirming mitigations have taken place through direct coordination with suppliers as needed.

BlueVoyant C-SCRM Solution Areas

BlueVoyant C-SCRM is a flexible managed service solution delivered through a secure, web-based portal or API, and supported by expert analysts in a U.S.-based Risk Operations Center.

Key Offerings:

- Supplier Risk Reports: Analyst-curated deep-dive reports that assess a supplier's structural, business, and cyber risk, with source-backed findings.
- Supply Chain Business Risk Monitoring: Continuous, analyst-validated monitoring across 12 risk categories — including financial, foreign influence, governance, and operational indicators — delivers contextualized alerts with analyst notes on potential mission impact.
- Supply Chain Cyber Risk Monitoring: Continuous, analyst-validated monitoring identifies supplier cyber risk across the externally observed attack surface — including email security, IT hygiene, vulnerabilities, malicious activity, and adversarial threats — with analyst notes on potential mission impact and recommended mitigation steps.
- Supply Chain Cyber Risk Remediation: BlueVoyant analysts coordinate directly with suppliers to address identified cyber issues, confirm remediation progress, and reduce exposure before exploitation.

Sample Federal Government Engagements:

- Vetting New Suppliers for FOCI Risk
- Detecting and Remediating Emerging Vulnerabilities Across Critical Suppliers
- Tracking Supplier Risk Posture Changes After Assessment or Audit Cycles

BlueVoyant C-SCRM Bundled Discounts for US Federal Agencies

The following bundles provide comprehensive coverage across all core BlueVoyant C-SCRM solution areas – but the same volume-based discount structure may be applied to individual components or customized combinations tailored to your mission needs.

Bundle Components Priced Per Supplier					
BlueVoyant C-SCRM Program Bundle	Supplier Risk Reports	Analyst-Validated Business Risk Monitoring	Analyst-Validated Cyber Risk Monitoring	Analyst-Led Cyber Risk Remediation	Total Annual Cost*
Focused	5	50	50	25	\$90,000
Moderate	10	150	150	50	\$225,000
Expanded	20	500	500	100	\$450,000

*Includes unlimited user licenses.
