

Meltwater Federal Efficiency Package: Turn live media intelligence into decision-ready answers

To receive pricing and/or to schedule an overview reach out to:

Meltwater@carahsoft.com or (571) 590-6510

Meltwater helps federal agencies, military commands, and defense organizations monitor global news, social, broadcast, and other media coverage, support more stakeholders, and deliver insights faster, often without additional staff or budget. By reducing repetitive work, simplifying fragmented workflows, and improving access to trusted external intelligence, Meltwater helps teams get more value from their existing technology investments.

Meltwater can be used to turn live intelligence into action with **Meltwater Explore with Mira Studio**, integrate data into existing systems through **APIs**, or connect external intelligence to AI agents such as ChatGPT and Claude through **Meltwater MCP**.

Meltwater Products offered as part of the Promotion:

Products	Capabilities
Meltwater Explore with Mira Studio	Helps teams search, analyze, and summarize media coverage faster so they can turn live intelligence into decision-ready answers.
Meltwater APIs	Allow organizations to integrate media data and analytics into internal dashboards, data warehouses, business intelligence tools, reporting workflows, and custom applications.
Meltwater MCP	Connects Meltwater intelligence to ChatGPT, Claude, custom agents, and other MCP-compatible AI environments, giving agency AI tools access to relevant news, social media, analytics, saved searches, and other Meltwater resources.

Where to Purchase:

- Meltwater is available through a wide range of governmentwide acquisition contracts and set-aside vehicles through Carahsoft directly and its partner network.
- Available procurement paths may include GSA Schedule, NASA SEWP V, ITES-SW2, SDVOSB, WOSB, 8(a), HUBZone, and other applicable contract vehicles.
- Carahsoft's GSA MAS IT and NASA SEWP Contracts

Who is eligible for the promotion?

- This promotion is intended for any federal entity or organization that is new to Meltwater or a current Meltwater user looking to upgrade from a legacy package.
