Case study

Unemployment claims, a pandemic, and the digital mailroom

Challenge

To say the pandemic had a major impact on our economy would be an extreme understatement.

And the amount of incoming mail due to unemployment claims increased dramatically as a result of COVID-related layoffs. One of the largest states in the US took this time as an opportunity to streamline its mailroom operations.

While the mailroom is generally thought of as a traditional back-office function, the pandemic put it in the spotlight. This state needed a way to expedite its unemployment claims while simultaneously applying the correct policies to meet federal regulatory and confidentiality requirements.

Solution

To handle the influx of unemployment claims and supporting documents, this state turned to our Digital Mailroom solution. In line with US Government regulations, our solution is NIST 800-53 compliant.

By digitizing tens of thousands of pieces of mail at the entry point, the state was able to more efficiently process incoming claims and apply retention policies.

Outcome

For this state, we were able to provide critical support for its COVID-19 relief. From document intake to digitization, classification, and secure disposal, our Digital Mailroom offering covered the

Industry

State government

Challenge

Deliver swift correspondence for incoming flood of unemployment claims in one state's physical mailroom

Solution

Iron Mountain Digital Mailroom

state's end-to-end unemployment claim processing for 1,500 users.

Not only were we able to digitize tens of thousands of unemployment claims, we extracted data from those forms to provide quick customer service.
