## Build practical skills that can be applied right away

Unlock **1,000+ lab experiences** to develop, apply, and assess your building skills in a safe, no-fee AWS Management Console environment

Build skills in guided, self-paced labs across technical domains

Grow role and industry expertise in game-based learning

Solve open-ended challenges in a gamified environment

Develop practical skills with hands-on practice in **AWS Builder Labs** and **AWS SimuLearn** that include interactive, guided solution-based exercises.

Engage in immersive simulations building real-world solutions in **AWS Cloud Quest** and **AWS Industry Quest**.

Test, verify, practice, and reinforce skills with **AWS Jam**, solving real-world challenges in security, migration, DevOps, AI/ML, and more.

Develop problem-solving skills and compete as a team with game-based simulations in **AWS Cloud Quest Tournaments** and open-ended cloud challenges in **AWS Jam events** – fostering shared learning, creativity, and trust.

Drive skills critical to your business, and gain insights from an **Administrative Dashboard**

Reskill and upskill at scale

Invest in your team's development

Provide the depth of expert AWS instructor-led training - on demand – with **AWS Digital Classroom**.

Provide employees with **AWS Certification exam focused preparation** to ensure skill depth and retain top talent

*“AWS Skill Builder Team subscription allows us to deliver structured training to ensure the scale we need to train hundreds of people with minimum oversight and resources.”*
