Aconex for Defense: secure, collaborative, data-driven program management

Cross-organization collaboration

Construction and engineering programs involve multiple agencies and DOD partners. Secure, modern methods of communication and collaboration ensures visibility and action, which keeps programs on-track and prevents waste.

Boost productivity with mobile

Most people expect that they can access information from the technology device in their pocket. A modern workforce is more productive with mobile access to the information they need, whenever they need it.

Security matters on defense programs

Adversaries target our networks, our information. Data breaches can be more serious than disrupting a program's schedule. Preventing bad actors from obtaining information keeps them from disrupting our economy, our democracy, our security.

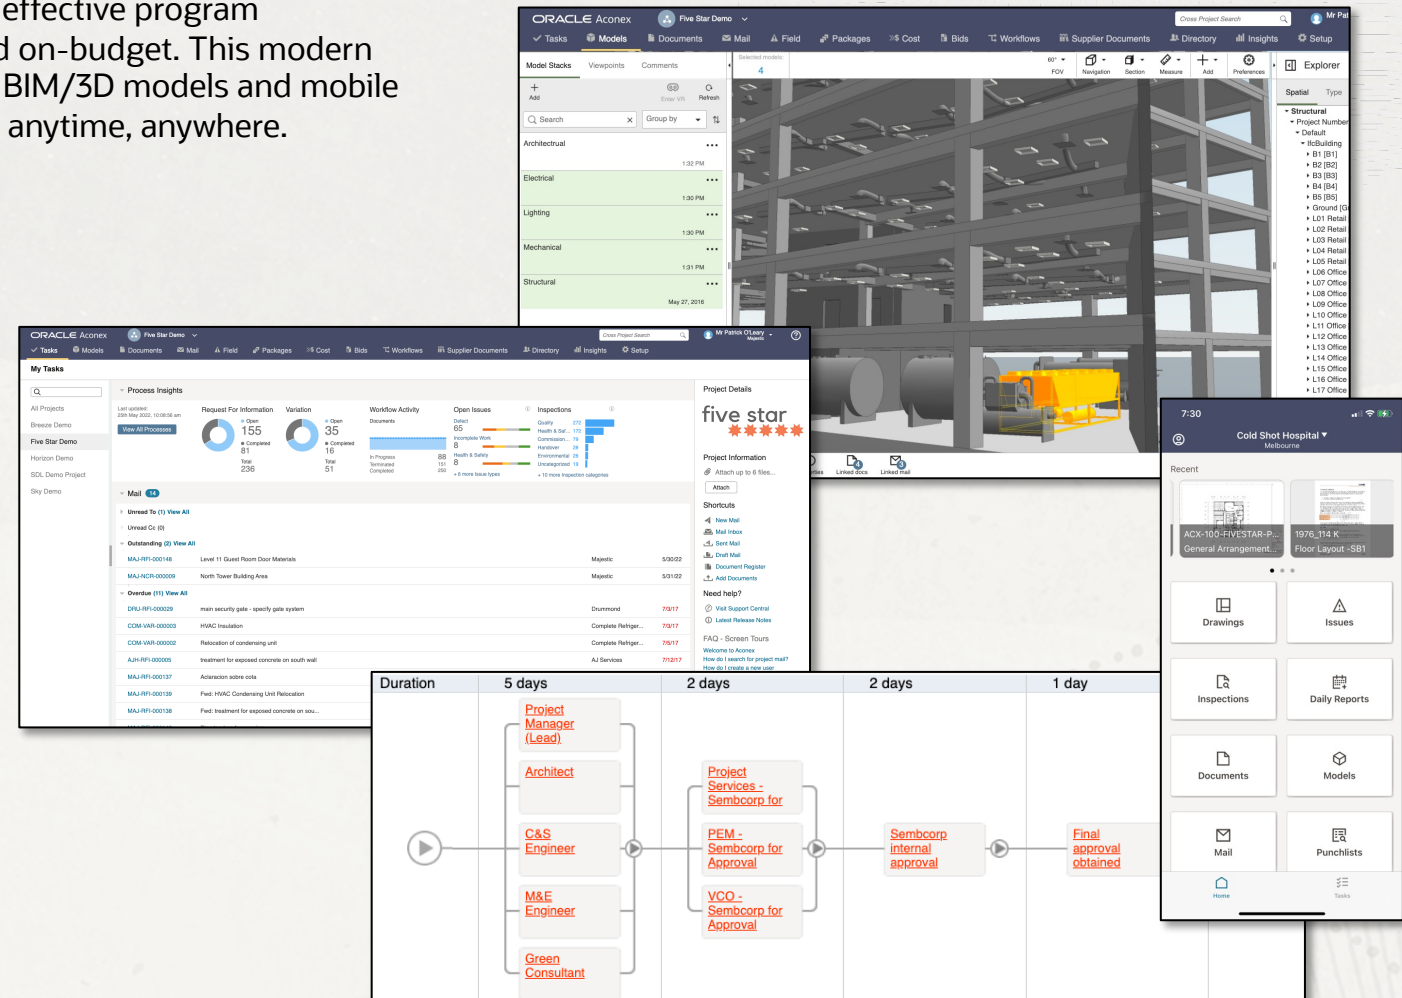

Data drives decision-making at speed

Access to accurate information can mitigate delays, rework and cost overruns. Accurate and up-to-date information ensures accurate data-driven decision-making, resulting in better outcomes.

Oracle Aconex for Defense enables secure cross-organization collaboration, document controls, and workflow automation for efficient and highly effective program management, ensuring missions are delivered on-time and on-budget. This modern cloud solution with modern technology such as integrated BIM/3D models and mobile apps provides authorized user quick access to information anytime, anywhere.

Features:

- Integrated 3D model viewing
- Document registry & revision history
- Bid and supplier documents
- Meta-data-based search engine
- Work packaging
- Configurable automated workflow
- Transmittals
- Task management
- Reports
- Audit trail
- iOS and Android mobile apps
- 2-Factor Authentication
- Encrypted data at rest and in transit
- Continuous monitoring and rapid remediation
- FedRAMP Moderate
- DISA Impact Level 4
