U.S. General Services Administration (GSA) announced an innovative OneGov agreement with Amazon Web Services (AWS) to provide up to \$1 billion in savings for cloud adoption, modernization, and training for federal civilian agencies through December 31, 2028.

Through this new agreement, federal agencies will have access to AWS training resources and a team of experts with specialized skills and experience to help them move from aging on-premises infrastructure to the cloud. Agencies can leverage AWS' cloud migration program, allowing them to speed up migration and modernization, reduce costs, and accelerate their adoption of AI technology.

- **AWS Credits:** Savings on core AWS cloud services.
- **AWS Modernization Credits:** Support to help agencies modernize their infrastructure and application technologies, plus large-scale IT transformation across government and spur AI innovation.
- **Training Credits:** Access to AWS training and certification.

## Where to Purchase:

Customers are eligible to receive credits through direct agency contracts with AWS, AWS partner-held contracts, and AWS reseller held contracts. Credits are not limited to just GSA Awarded contracts.
