RISE ABOVE THE NOISE. CALL THE RIGHT PLAY.

REAL GUIDANCE. PROVEN APPROACHES. YOUR CHOICE.

NO MAGIC-NUMBER PROMISES

Authorization depends on architecture, controls, evidence, assessment, and readiness — not a universal timeline.

DON'T RE-ARCHITECT YOUR PRODUCT

Fit the compliance model to the application — not the application to the compliance platform.

CHOOSE THE RIGHT PATH

Hosted through The Armory or Managed In-Boundary, based on your architecture, ownership requirements, mission, and long-term goals.

BUILT BEYOND THE ATO

Continuous monitoring, evidence, operations, and support after authorization.

The right FedRAMP path fits your product — not the other way around.

CHOOSE YOUR FORMATION

TWO PATHS. ONE MISSION.

SAME EXPERTISE. YOUR ENVIRONMENT. YOUR CHOICE.

HOSTED THROUGH THE ARMORY

BUILT-IN STRENGTH.

- **Use an authorized environment** — Build on The Armory's FedRAMP infrastructure.
- **Lower compliance overhead** — Less hardware, tooling, and upkeep.
- **Faster time to authorization** — Leverage proven, repeatable processes.

OR

MANAGED IN-BOUNDARY

MAXIMUM FLEXIBILITY.

- **Operate in your own environment** — You control your security boundary.
- **Own your stack** — Keep your SSP and retain program flexibility.
- **Built for long-term control** — Develop internal expertise and adapt as needs evolve.

FIT THE COMPLIANCE MODEL TO THE APPLICATION — NOT THE APPLICATION TO THE COMPLIANCE PLATFORM.

WHY stackArmor

EXPERIENCED TEAM | PROVEN PROCESSES | PRACTICAL TOOLS | REAL-WORLD RESULTS
