DATA SHEET

Trellix Data Loss Prevention

Protect against intentional and accidental data leaks

Data loss is one of the greatest threats to organizations today. A breach can financially ruin an enterprise, not to mention the potential irreparable reputational harm. At the same time, not all information can or should be protected. That's where Trellix Data Loss Prevention (DLP) comes in. With exceptional visibility across data types and throughout the data lifecycle, organizations can find sensitive information and intellectual property, classify only the data that requires added protection, determine policies to be applied across the environment, and detect inappropriate activity for remediation.

With Trellix DLP, out-of-the-box options for policies and reports that map to common compliance frameworks make it easy to pass the next audit or regulatory review. Open architecture makes it easy to integrate with third-party tools like SIEM and SOAR to ensure that incidents can be managed effectively from end to end. With a central, unified console, available on-premises or via SaaS, enterprises will benefit from streamlined and simplified administration for policies, event detection, reporting, and more.

Trellix Data Loss Prevention Products

Trellix DLP protects the most common enterprise data loss vectors across endpoints, email, the web, networks, and data storage.

Trellix Data Loss Prevention Endpoint

- Trellix Data Loss Prevention Endpoint Complete – Protects sensitive and proprietary data on Windows and macOS workstations and servers from data exfiltration. Features include data discovery and classification, user coaching, as well as content filtering, monitoring, and blocking.
- Trellix Device Control (included in DLP Endpoint Complete or available as a stand-alone) - Protects devices from unauthorized device installation and provides features for content monitoring, filtering, and blocking.

Trellix DLP protects top data leak vectors and across 400+ content types

Workstations (Laptops/Computers)

Network

Email

Web

Comply with multiple regulatory and industry standards, including

Financial reporting

Trellix Data Loss Prevention Network

- Trellix Data Loss Prevention Network Prevent - Protects sensitive information over networks, email, and the web. Features include exact data matching, information capture, data exfiltration prevention, and available Optical Character Recognition (OCR).
- Trellix Data Loss Prevention Network Monitor - Scans network data in real-time to detect anomalies in traffic. Features include exact data matching, information capture, data collection to speed up investigations, and available OCR.

Trellix Data Loss Prevention Discover

- Trellix Data Loss Prevention Discover - Get unprecedented visibility across networks and file repositories to find and classify sensitive and proprietary data. Features include exact data matching, rights management, auto-classification for sensitive data, as well as the ability to inventory, copy, and move files. Optical Character Recognition is also available.

Trellix Data Loss Prevention Packages

Package	Products	Consider it to Address
Trellix Data Security Endpoint Protection Suite	Trellix DLP Endpoint Complete and Trellix Data Encryption Suite	Insider threats, risk & compliance, expanding information footprint
Trellix Data Loss Prevention Network Suite	Trellix DLP Network Prevent, Trellix DLP Network Monitor, and Trellix DLP Discover	Insider threats, risk & compliance, expanding information footprint
Trellix Data Loss Prevention Suite	Trellix DLP Endpoint Complete, Trellix DLP Network Suite	Insider threats, risk & compliance, ransomware, expanding information footprint

Trellix DLP products can be combined to address the most common threats facing organizations today. Trellix expert professionals can also help with implementation and training to speed up adoption and ensure that the value of new technology is realized quickly.
