COMPANY OVERVIEW

Global Telehealth Services (GTS) is the developer of GTS VirtualHealth Platform™ (GTS-VP), a FedRAMP Authorized, open architecture, universal middleware platform, that provides Remote Patient Monitoring and Treatment at Distance. The GTS-VP is designed to be an enterprise solution, configurable to the workflows and business processes of healthcare organizations and payors, and able to meet current and future needs in these areas.

KEY PLATFORM CAPABILITIES

- Disease state/health condition agnostic and device adaptable
- Flexible patient engagement, to meet every patient where they
- Customizable patient assessments and protocols
- Patient/caregiver secure messaging and video conferencing
- Integration of peripheral medical devices
- EMR/EHR integration via Azure FHIR
- Software-only SaaS healthcare model for maximum flexibility

CLINICIAN PORTAL

The GTS-VP is provider-centric allowing the capabilities of RPM and Treatment at Distance to be integrated into a comprehensive treatment plan.

- Create specific, adherence-based treatment plans helps to drive patient behavior, to improve patient outcomes
- Exception-based management, reducing care team workload

PATIENT APPLICATION: *GTS VirtualHealth™*

The GTS VirtualHealth™ mobile app provides a robust, dynamic, yet simple interface for most patient engagement. Including capabilities for:

- Vital reading collection
- Patient assessments and surveys
- Image collection
- Secure messaging/video conferencing
- Patient education and engagement

COMPANION APPLICATION: *GTS SmartShare™*

A separate mobile app that allows for the inclusion of family and friends in the care process, helping to drive treatment plan adherence and improve patient outcomes.

SECURITY & COMPLIANCE

The GTS-VP is the only FedRAMP Authorized RPM platform in the market. GTS also holds an Authority to Operate (ATO) with VA.

TREATMENT AT DISTANCE

- Provide a means to treat the most expensive chronic patients and reduce preventable hospitalizations
- Configurable, comprehensive treatment for any disease state
- Increased access to care for rural and disabled patients
- Robust patient education and engagement to increase compliance and adherence

The limit of what can be done remotely is only beginning to be understood. The future of Treatment at Distance is only limited by lack of imagination.
