COHESITY

Cohesity Solutions
AI-powered cyber threat protection. Rapid ransomware recovery.
Hybrid cloud mobility.

As the number of ransomware attacks against colleges and universities continues to rise, campus leaders face significant challenges in protecting the availability, confidentiality, and integrity of their data. But with Cohesity your organization can be well prepared for any type of threat.

- **Simplified Data Security and Management:** One comprehensive solution that can handle data security, backup, and recovery across multiple environments using a single user interface to boost compliance, drive down costs, and lower risks.

- **Protect Against and Detect Ransomware Attacks:** Protect your data with encryption, immutability, and advanced access controls while ML-based anomaly detection and threat scanning identify threats so you can respond and remediate fast.

- **Reduce Downtime with Rapid Recovery:** Instantly recover hundreds of objects/VMs to any point in time using fully-hydrated snapshots. Avoid reinjecting malware or vulnerabilities in production while restoring by scanning backup snapshots to uncover cyber exposures and vulnerabilities before performing a restore.

Company Overview
Cohesity is a leader in AI-powered data security and management. We make it easy to secure, protect, manage, and get value from data — across the data center, edge, and cloud. Cohesity helps organizations defend against cybersecurity threats with comprehensive data security and management capabilities, including immutable backup snapshots, AI-based threat detection, monitoring malicious behavior, and rapid recovery at scale. Cohesity solutions can be delivered as a service, self-managed, or provided by a Cohesity-powered partner.

Please visit Cohesity's booth at Educause to learn more on how we can help you secure, manage and backup your data.
