

ModelOp

Govern and Scale Enterprise AI Initiatives

Who We Are

ModelOp, the leading AI Governance solution for G2000 enterprises, helps safeguard all AI initiatives — including LLMs and generative AI — without stifling innovation. Through automation and integrations, ModelOp empowers enterprises to quickly address the critical governance and scale challenges necessary to protect and fully unlock the transformational value of enterprise AI.

What ModelOp Provides

ModelOp helps enterprises establish visibility into all AI initiatives, take control of risk management, and accelerate innovation — resulting in reliable, compliant, and scalable AI systems. ModelOp is the only commercially available software, backed by years of experience with F500 companies, that is comprehensive, agnostic, enterprise-grade, and easy to get started.

Additional Information

ModelOp is a leading vendor in Gartner's AI Trust, Risk, Security Management (TRiSM) market guide (2021, 2022, 2023). ModelOp customers are the biggest names in the Fortune 500 including:

- Top healthcare and pharmaceutical organizations
- Top bank, investment, and insurance firms
- Regulatory organizations for financial markets
- Top CPG and retailer enterprises
