

Asana (NYSE: ASAN) is the leading enterprise work management platform that helps higher education institutions work smarter together.

Asana creates one source of truth for all work across your campus - providing clarity and control over how that work happens, reducing inefficiencies, bringing teams together, and driving increased engagement.

Only Asana combines the power of artificial intelligence with the most complete and connected network of your organization's work data – using the Asana Work Graph® – to maximize the impact of your people.

Reimagine Work Management for a Modern Campus

Navigate work, intelligently

With functionality like Goal-based resourcing, Portfolios and Reporting, we help teams set ambitious goals and operationalize them throughout their organizations. Leaders have the high-level insights they need to understand progress across their school, department, or program, driven by real-time data to course correct as needed.

Do your best work, together

With Asana, AI can help teams and schools work more efficiently than ever before. With a platform that is flexible enough to span silos and expedite workflows, we help every member of every team do more of their best work, and less of that busy work

Scale your work effortlessly

With the security, reliability and compliance you can trust, Asana is the most trusted collaborative work management platform with the largest deployment of any of our competitors and the only platform proven to scale from small teams to 200k+ seats. Learn more about our security and compliance features important to higher ed by visiting our [Trust Center](#).
