Tranquility provides innovative solutions to help your team **save time, improve accuracy, and solve bigger problems**.

90% OF CRIMES
involve a digital component

3 OUT OF 5
investigative teams do not have time to review and analyze all digital data.

2 OUT OF 3
agency leaders believe technology can mitigate challenges posed by staffing shortages.

OVER HALF
reported that the rising volume of evidence presents challenges.

120% INCREASE
in time it takes for investigators to receive an extraction report.

MAJORITY OF MANAGERS
believe that staff members lack sufficient training to effectively address digital crimes.

Law enforcement needs results. Tranquility's AI-powered investigation tool, TimePilot, **helps clear cases:**

TimePilot is employed across a spectrum of settings to **process cases faster and more accurately.** Analysis of case data, such as jail phone calls, video surveillance, and text messages, typically requires significant time investments by investigators, analysts, and prosecutors. **Not with TimePilot.**

Generates a data-rich timeline with automated correlation to source materials.

Features an intelligent assistant to interact with your case files.

Utilizes a proprietary language model with 120+ languages and slang comprehension.

Exhibits sophisticated analysis and writing capabilities.

TimePilot streamlines the process by **surfacing key evidence in seconds:**

Others endlessly search to answer **these questions:**

Are there any pictures of a blue truck, are there any linked accounts, what devices were used to access this, account, did they talk about (guns, money, names), who is nicknamed "X", did they talk in code, how people wearing a backwards white hat, find someone in a red shirt next to a blue truck, where, when, and who collected the murder weapon, summarize the cause and manner of death, list all of the cases linked by NIBIN to the 9mm, are there any discussions of crime, are there photos of people dressed in black with guns, are there any communications about fentanyl?

TimePilot does the hard work & analysis **for you:**

Cellphone extractions, social media records, jail calls, audio files, video analytics, forensic files
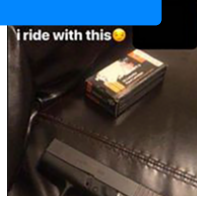

Generating a timeline:

SEPTEMBER 11, 2019

this for everybody who picked hallow if somebody swing on your block don't waist your time shooting at they car cause the bullets not gone go thru they break

DIXON POSTS:
"This is for everybody who picked hallow if somebody swing on your block don't waist [sic] your time shooting at they car cause the bullets not gone go thru they break on contact."
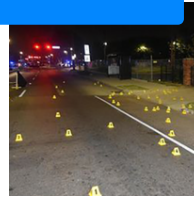

SEPTEMBER 17, 2019

i ride with this

DIXON POSTS A VIDEO WITH A GLOCK 27.
In the video, the serial number of the firearm was partially visible and matches the firearm seized at Dixon's residence after the shooting.

SEPTEMBER 17, 2019

Of the 54 total shell casings found at the crime scene, only 22 were fired by Dixon. **THE REMAINING ROUNDS INDICATE THE PRESENCE OF A SECOND SHOOTER.**

2023

Four years after the shooting, a deep dive into open source intelligence revealed a connection to the unknown second shooter in the **MURDER OF CORNELIUS SMITH AND ATTEMPTED MURDER OF SEVEN OTHERS.**

TimePilot ingests a variety of data sources:

Cellebrite   AXON   Dedrone   coinme   ring

PDF   JPEG   MP3   MP4   DOC   XLS   Jail Calls

TimePilot

We ensure the highest level of data security and are **fully CJIS Compliant**.

Featured Investigation Categories:

- Violent Crimes
- ICAC
- ORC
- Fentanyl
- Financial Crimes
- Medicare Fraud
- Gangs
- Forfeitures
- Crimes Incited by Inmates

TimePilot will transform your investigation. Get in touch:

" Tranquility AI is a game changer. It found a needle in a haystack of data during a complex investigation. It provides agencies of all sizes the ability to police today's criminal landscape.

Sheriff Max Dorsey
CHESTER COUNTY, SOUTH CAROLINA
