WEBINAR BRIEF

Unifying IT Management:
Real-Time Visibility and Actionability With Tanium & ServiceNow

Tanium + ServiceNow Webinar ● February 20, 2025

KEY IT MANAGEMENT OBSTACLES

Organizations often struggle with incomplete asset visibility, outdated CMDB data, inefficient IT workflows, and security vulnerabilities. These challenges lead to higher costs, increased risk exposure, and slower incident response times, making IT management more complex and less effective.

A SMARTER APPROACH TO IT MANAGEMENT

Tanium and ServiceNow work together to deliver a seamless, platform-to-platform IT management solution that drives efficiency and provides actionable insights. Tanium delivers near real-time data from all endpoints in your IT estate, enabling precise actions on these devices. ServiceNow orchestrates these actions with its Digital Workflows, acting as the brains, while Tanium serves as the eyes and hands. By integrating Tanium's real-time endpoint data with ServiceNow's Digital Workflows, organizations achieve more complete, reliable, and relevant data.
