NavigateCyber is an AI-powered automated platform that realizes an efficient RMF process by decreasing the time and cost it takes to obtain approvals and facilitating re-certification in a timely manner.

Problem: The Cybersecurity Risk Management Framework (RMF) process often takes 12-18 months and recruiting/retaining a skilled cybersecurity workforce (CSWF) is challenging.

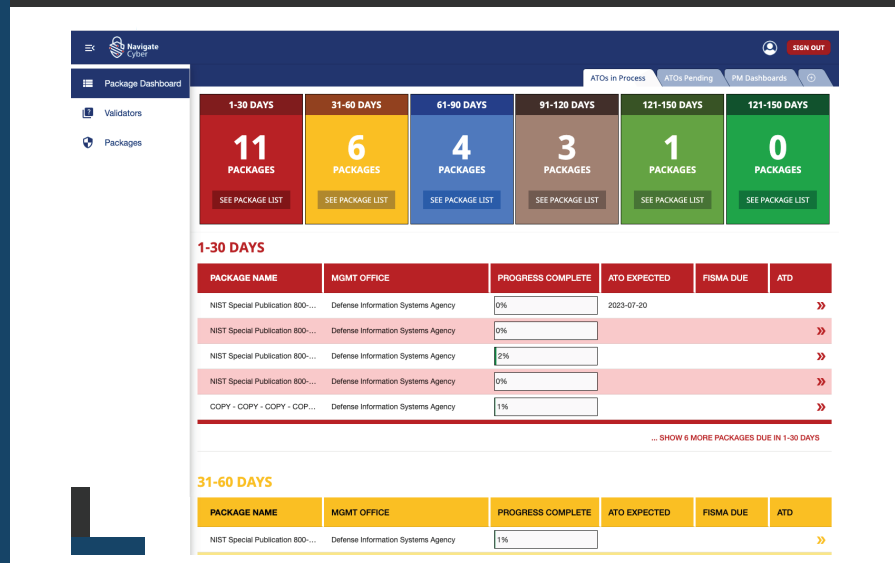

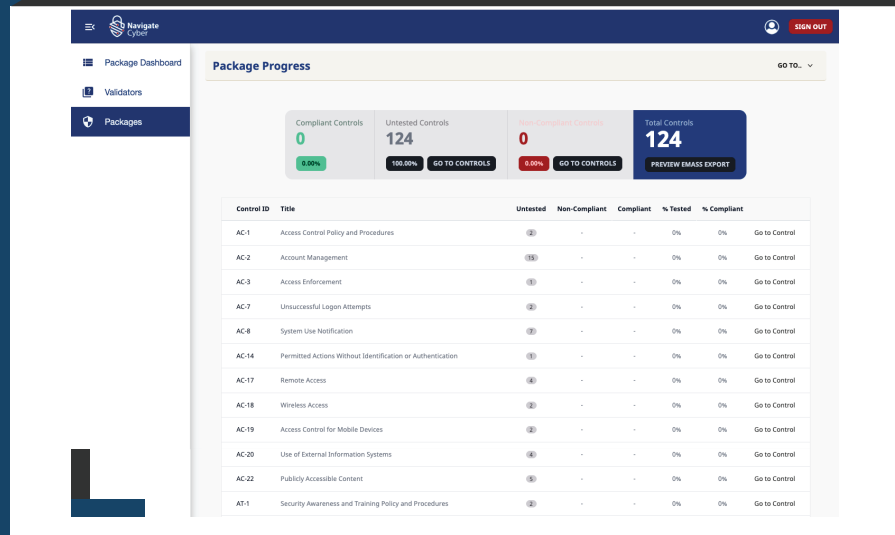

NavigateCyber Solution:

- Automate the RMF workflow process through AI-powered security control selection
- Continuous readiness through managed and automated RMF processes.
- RMF Command Center ensures visibility and analytics in support of key ATO metrics
- Allows for ATO prioritization based upon package completeness
- 100% focused on NIST RMF end to end process with agnostic platform architecture

NavigateCyber Benefits:

- Facilitates every step of the RMF process incorporating AI + Intelligent Automation
- Accelerates Time to ATO by up to 90% reducing manual error prone processes
- Alleviates demand for senior CSWF by simplifying cybersecurity compliance tasks
