PUBLIC SECTOR

Transform risk into opportunity

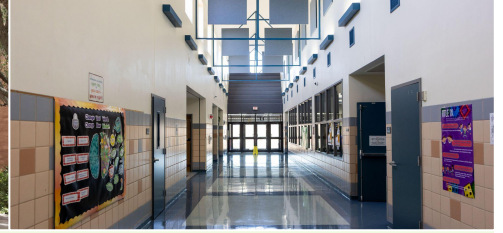

Optro's AI-powered GRC system of action enables public sector organizations to break down silos, mitigate exposures across all types of risk, work more efficiently, and deliver better stakeholder service.

Top rated by customers

The Optro difference for the public sector

State and local government

Challenges:

Fragmented infrastructure, complex oversight, resource constraints

How Optro helps

- Provides an agentic system of action built on a single, shared data core for cross-department visibility and coordination
- Enables intelligent control mapping, allowing government teams to map a single control to multiple regulatory requirements, such as GAAP, FLSA and ADA, simultaneously
- Uses autonomous testing and other features to automate high-volume, highly manual tasks that bottleneck small teams

Higher education

Challenges:

Decentralized campus operations, diverse regulatory frameworks, third-party vendor risk exposures

How Optro helps

- Replaces disjointed departmental systems and spreadsheets with a single pane of risk for university-wide visibility and quick action
- Enables the mapping of a single internal control (like an encryption policy or access control) to multiple regulatory standards simultaneously
- Speeds up new vendor vetting by automatically generating standard security questionnaires and calculating risk scores.

K-12 education

Challenges:

Cybersecurity and IT risk management, student data privacy compliance

How Optro helps

- Integrates with existing security tools to automatically prioritize cyber threats that present the greatest risk to school operations
- Enables efficient screening of new educational tools by analyzing a vendor's security policies and previous compliance documentation
- Provides one platform for auditing both student data privacy policies and digital accessibility mandates, sparing small administrative teams from tedious, duplicate compliance logging

“When we’re doing our audit work and when we’re doing the compliance work — Optro is automatically tying all that together for us.”
