The Commvault Data Protection Bundle (DPB) is designed to help customers with end-to-end protection across their on-premise, cloud, and Active Directory environments. Included in this bundle is Data Protection software for all on premise structured and unstructured data workloads, cloud workloads, Air Gap Protect for data immutability and Active Directory backup and recovery capabilities. All using Commvault's award winning FedRAMP High Authorized data protection platform.

Commvault DPB is part of a new strategic agreement between Commvault and GSA, in alignment with GSA OneGov Strategy, that enables agencies to maximize their existing Commvault investments, retire redundant software, and accelerate the modernization of legacy systems.

As part of the offer Commvault and Carahsoft are offering a 60% bundle cost savings over buying the same products individually.

Commvault Cloud Data Protection
- Commvault Cloud Data Management Software offers a robust set of capabilities designed to provide comprehensive data protection, enhance cyber resilience, and simplify operations across complex hybrid environments.   - Commvault Cloud offers single pane of glass management across all workloads—on-premises, cloud, and SaaS—providing a unified management experience that simplifies administration   - Commvault Cloud implements a zero-trust architecture with comprehensive SAML, MFA, MPA, and RBAC controls, allowing customers to regulate and audit application access.   - Commvault Cloud is FedRAMP High Authorized, meeting the most stringent confidentiality, integrity, and availability standards recognized by the U.S. government.

Commvault Air Gap Protect

	• Air Gap Protect is fully integrated with Commvault Cloud Software allowing seamless operation. • Immutable, air gapped ransomware protection, for both long- & short-term data retention needs • Significant Cost Control and Predictable Pricing AGP provides cost control with no egress, no guesswork, and no hidden fees, differentiating it from typical cloud storage models.

Commvault DPB for Active Directory

	• Unified Protection for Hybrid AD & Entra ID Environments Commvault offers single-solution protection for both Microsoft Active Directory (on-premises) and Entra ID (formerly Azure AD), safeguarding customers' hybrid directory environments. • Flexible, Granular Recovery Capabilities Beyond full forest recovery, Commvault offers granular recovery capabilities that allow administrators to quickly recover only the missing, damaged, or misconfigured object attributes. • Enhanced Cyber Resilience and Ransomware Protection Active Directory is recognized as a primary attack vector for adversaries and a significant target for ransomware

Commvault Cloud Best In Class:
- Meets Azure GCC High data security controls and Impact Level 5 DoD Controlled Unclassified Information (CUI) requirements, plus meets Zero Trust Architecture Data Pillar mandates
- Gartner Leader for Enterprise Backup & Recovery 14 Years in a row
- Commvault Air Gap Protect is FedRAMP High Authorized, signifying that it meets the most stringent confidentiality, integrity, and availability standards recognized by the U.S. government.

Where to Purchase:

The bundle is available exclusively on Carahsoft Technology Corporation's GSA Schedule and available through eligible Commvault/Carahsoft Federal resellers.
