DATASHEET

Cybersecurity Solutions
We Break the Attack Chain

Cyberattacks follow a pattern, starting with reconnaissance, weaponization, and delivery through exploitation, installation, and command and control (C2), finally acting on their objectives and harming your business, your brand, and your customers.

Dissecting this pattern — breaking this chain into distinct stages — helps your cybersecurity defenders understand, anticipate, and mitigate attacks at various points in the chain. **At Fortra, our mission is to break the attack chain.**

Recon	Weaponize	Deliver	Exploit	Install	Command & Control	Achieve Objectives
Vulnerability Management Application Security Testing Pen Testing Services Core Impact Pen Testing Software Cobalt Strike & Outflank Red Team Tools Security Configuration Management	Brand Protection Email Security Managed WAF		Managed XDR File Integrity Monitoring			DLP CASB DSPM Data Classification Security Awareness Training

3 Reasons to Choose Fortra

1. **Complete attack chain coverage**. Fortra solutions are designed and built to detect and prevent advanced attacks using real-time indicators of compromise and exclusive AI models that improve accuracy and automation.

2. **Offensive and defensive security.** Fortra offers software and services that follow the same pattern attackers use, so you can test, simulate, and strengthen your defenses in real time.

3. **Shared threat intel and analytics.** Fortra's nearly 400 globally recognized experts generate original threat research and intelligence to protect our customers and contribute back to the cybersecurity community. We also collaborate with global law enforcement agencies, ISACs, and other public and private sector organizations to disrupt malicious actors and their infrastructure.

Executive Summary

Fortra works relentlessly to disrupt threats and help our customers build organizational resilience. Here's how we do it.

Complete Visibility

With full visibility across the attack chain, Fortra disrupts attacks before they succeed.

- Unified, cloud-native platform with agent
- Exclusive AI models for accuracy and automation
- Real-time indicators of compromise for changing threats

Flexible Delivery

Fortra offers offensive and defensive solutions tailored to organizational needs.

- Interoperable modules for any maturity level
- Product and/or managed services models
- Progressive discounting for superusers

Open Intelligence

Fortra anonymizes and correlates threats across our client base, so we all get smarter together.

- Bi-directional threat intel exchange with global law enforcement
- Exclusive threat research
- Third-party integrations

Fortra Cyber Defense Platform

Fortra's extensive arsenal of advanced capabilities will be brought together in our solution-based platform. This cloud-native, multi-solution defense platform will allow you to:

- Perform advanced correlation across your data, regardless of the source
- Experience the synergy of a suite of products designed to work together
- Simplify administration to deliver more timely security outcomes
- Respond more effectively with a centralized, big-picture perspective

Fortra Intelligence and Research Experts

Our team of threat intelligence experts are skilled professionals who share a common goal of dismantling emerging exploits. The diverse skillsets of our team members add credibility and a 360-degree perspective to our analysis, investigation, and threat vetting techniques. Team members include:

- Vulnerability researchers
- Malware analysts
- Data scientists
- Security architects
- Automation engineers
- Security developers
- Reverse engineers
- Red and blue team experts
