A START-UP WITH MORE THAN 60 YEARS OF HISTORY

Panasonic
Security Systems

i-PRO

1962 - RELIABLE, QUALITATIVE, TRUSTWORTHY

2019 - RELIABLE, QUALITATIVE, TRUSTWORTHY
AI DRIVEN, INNOVATIVE, FLEXIBLE

BUILT ON A LEGACY OF RELIABILITY

i-PRO Americas Inc. was carved out from the Security Systems Business Division of Panasonic Corporation in 2019 and operated as Panasonic i-PRO Sensing Solutions of Americas under a transition services agreement until April 2022 when it became fully independent changing its name to i-PRO Americas Inc., carrying with us our i-PRO brand and our comprehensive line of i-PRO video surveillance products and solutions that offer the industry's highest picture quality, mission critical reliability and the industry's lowest total cost of ownership.

i-PRO CORE TECHNOLOGY

Edge AI Technology

- Wide variety of AI camera models
- Computer vision chip architecture
- Maximizes system performance

Open Platform

- Integrates into leading VMS
- Supports technology partner applications
- Provides development support with SDK/API

Cybersecurity

- NDAA compliant
- Built-in cyber security features
- FIPS 140-2 Level 3 certified secure element
- Pre-installed certificates

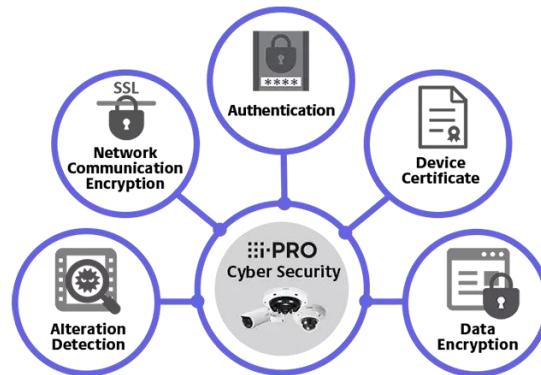

Product Reliability

- Environmental durability
- Designed for less maintenance

Reduced Bandwidth

- AI Smart coding
- AI-based optimization
- 3D noise reduction

FEDERAL CYBERSECURITY COMPLIANCE

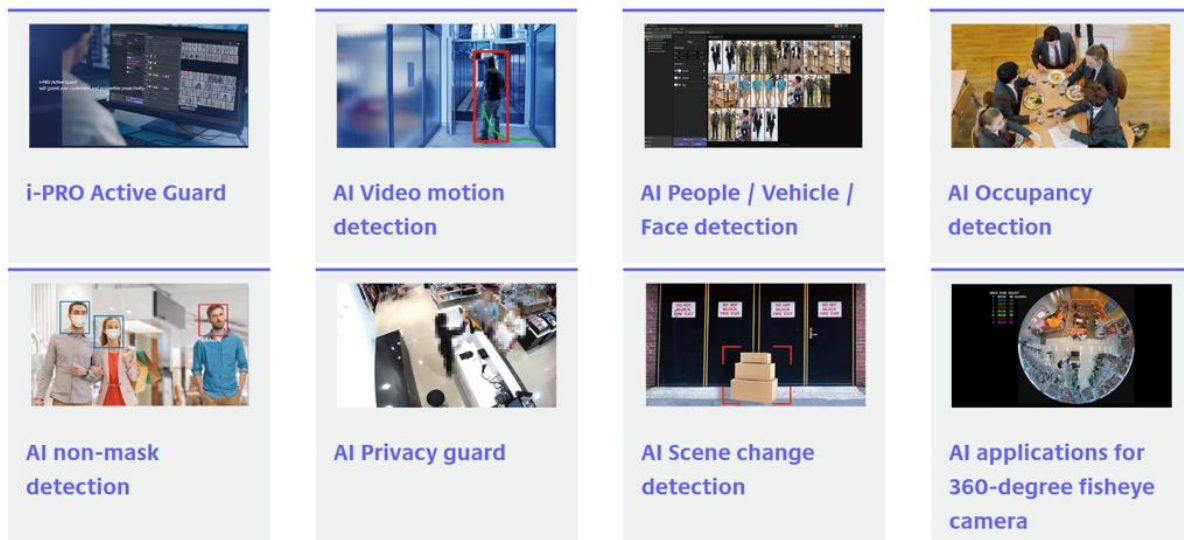

As an OEM technology provider to the Federal government that spans more than 25 years with Panasonic, i-PRO Americas' sophisticated IT expertise and in-depth integration experience provide the level of expertise required to build high-performing physical security environments and networked IT systems that protect the people, assets, and facilities of Federal agencies at all times.

In order to help create a safer world, i-PRO works hard to ensure that all our practices and products are up to date and in compliance with governmental standards. i-PRO was the first company in the security industry to provide a pre-installed signed certification by a third-party certificate authority. Our latest models of i-PRO network cameras have equipped a Secure Element which is certified the FIPS 140-2 Level 3 compliant.

i-PRO Edge AI Analytics Technology

In today's environment, more Federal agencies and military organizations are looking to actively manage large surveillance systems. As these systems become more complex, i-PRO's intelligent analytics can help security forces by reducing the learning curve and system resources required to operate them. From improving the accuracy of alarms and notifications to reducing the overall system bandwidth and storage requirements, i-PRO Intelligent analytics provides superior **situational awareness for threat assessment and incident command**.

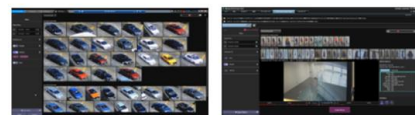

From our powerful i-PRO Video Insight Video Management Software to our Active Guard analytics, to our Monitor Cast Access Control platforms, and with industry-renowned line of cameras, server solutions and door access control components, we've got Federal agencies and Military organization's surveillance and security needs covered.

Hardware Compatibility

Software Integration

✓ Analytics on 3rd party VMS

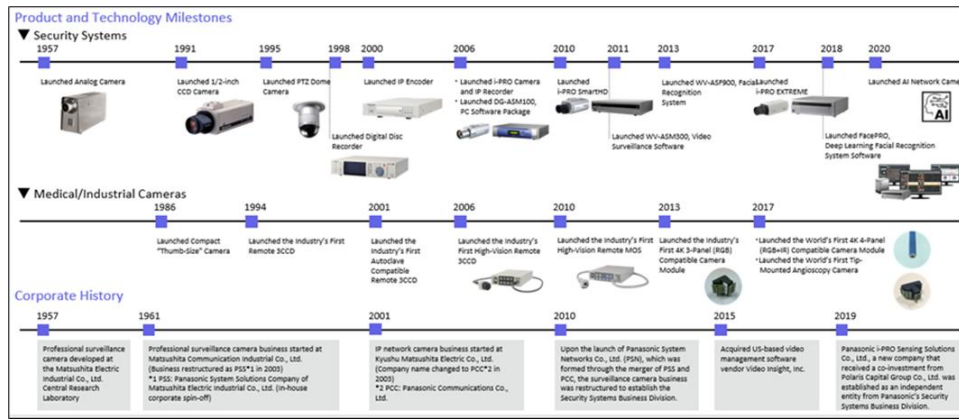

✓ Detailed settings on 3rd party VMS

And i-PRO products provides an open platform that integrates with innovative, complementary partners to deliver the best access control and intelligent door lock solutions for our customers.

ACCESS CONTROL PARTNERS

Secure Supply Chain & Cybersecurity Compliance

i-PRO Americas Inc. is proud to confirm that our products are compliant under the National Defense Authorization Act (NDAA). Our company was founded on the principles of trust, safety and security. We are committed to ensuring that our products meet the needs of all our customers and that we continue being a trusted partner to our educational clients and our federal, state and local governments. As a trusted partner of the government, we have many camera models that are available through the GSA Schedule and are compliant under the Trade Agreement Act (TAA).

And key **built-in cybersecurity technology** that are built-in to i-PRO Public Safety products include:

- i-PRO cameras also support protecting data at rest by encrypting the Solid State Drives (SSD for ICV) and Secure Digital (SD for BWC) card so that data cannot be compromised if the camera is lost or stolen.
- i-PRO cameras support secure protocols (HTTPS, SSL, RTSP, SRTP) and digital certificates to ensure data is encrypted when being sent across the network.
- FIPS 140-2 encryption which meets CJIS Security Requirements 5.9.1 compliancy.

CMCC Level 2

Type II Compliant
