

The dedicated Cybersecurity and Defense team at Carahsoft specializes in providing federal, state and local government agencies with a variety of cybersecurity solutions to secure their cyber ecosystem. Our trained and certified representatives have a thorough understanding of the government’s cyber requirements and mandates, such as NIST’s Cybersecurity Framework, allowing us to accurately match our cybersecurity portfolio with our customers’ specific needs.

Carahsoft has partnered with numerous technology providers to offer government entities proven, cost-effective protection for systems, networks and assets. These solutions, all of which are available through our GSA schedule and NASA SEWP contracts. Our portfolio of cyber products and services fall under the following categories: Network & Infrastructure, Security Operations & Incident Response, Endpoint Security, Data Security, Identity & Access Management, Risk & Compliance, IoT, Mobile Security, and Web & Messaging Security.

Investing in critical infrastructure security is essential to protecting our country’s physical and economic well-being. Determine the vulnerabilities, reduce risks and combat cyberattacks with our comprehensive portfolio of products and services that support your agency’s needs.

LEADING CYBERSECURITY SOLUTIONS

 Platform for Machine Data	 Next Generation Security Platform	 Agentless IT, IoT & OT Device Visibility & Control	 Intelligent Traffic Visibility Solutions
 Targeted Cyber Attack Detection & Response	 Global Leader in Information Security	 Security for Data, Operations, Applications & Identity	 Protective Threat Detection & Response
 Intelligence Driven Security Solutions	 Application Delivery & Security	 Cloud Access Security Broker	 Protect Critical Infrastructure Against DNA Attacks
