

All-Inclusive Communications and Proven Security with FortiVoice

Fortinet’s secure, enterprise-grade phone systems deliver modern communications without the cost or complexity.

Streamline Communication, Strengthen Security

FortiVoice is Fortinet’s secure, all-in-one unified communications (UC) system, providing reliable voice, conferencing, fax, and chat in a single solution. Built for ease of deployment and management, FortiVoice supports hybrid workforces while helping organizations protect sensitive conversations and maintain essential services.

Available in cloud, virtual, or physical appliance form factors, FortiVoice integrates seamlessly with Fortinet’s security and networking solutions, delivering high availability, centralized control, and cost efficiency without complex licensing or add-ons.
