

DEVSECOPS

DevOps and DevSecOps are philosophies, movements, and even cultures of continuous software improvement and integrated security - at scale. The result delivers a powerful advantage for government agencies who are undergoing a digital transformation: faster releases, more secure releases, greater interoperability and the freedom to focus on the mission. Carahsoft represents proven solutions, delivering to agencies the innovative solutions needed for every phase of the DevOps and DevSecOps lifecycles and with security built-in every step of the way. These solutions provide support for collaborative planning, rapid code builds, iterative testing, rapid release, optimized deployment and ongoing monitoring that continuously feeds into the next wave of planning.

Within this portfolio, Carahsoft is pleased to carry solutions that fall under the following categories:

- Agile Planning & Collaboration
- Development Tools
- Continuous Integration & Delivery (CI/CD)
- Build & Test
- Security & Compliance Tools
- Certified Kubernetes Distributions
- Monitoring
- Application Deployment
- Cloud Providers

AGILE PLANNING & COLLABORATION

 <p>Issue Tracking & Code Integration</p>	 <p>Create & Collaborate</p>	 <p>Turn Outputs into Outcomes</p>	 <p>Free your apps. Simplify your Ops.</p>
 <p>Innovators in the Open</p>	 <p>Micro Focus Octane, Track Backlog, Issues & Metrics</p>	 <p>The Digital Collaboration Tool</p>	 <p>End-to-End Observability for Modern Apps</p>
 <p>Open Source Chat Service</p>	 <p>Leader in End-to-End Value Stream Management</p>		

DEVSECOPS

DEVELOPMENT TOOLS

 Git-based Code Collaboration	 Enterprise DevOps & Jenkins Solutions	 Your Workflow, Your Cloud for the Development Environment	 Turn Outputs into Outcomes
 Open Source DevSecOps Application	 Free your apps. Simplify your ops.	 The Kubernetes Platform for Big Ideas	 App Security & Services from Code to Customer
 Open Source DevSecOps Application	 Infrastructure as Code	 Build, Develop & Collaborate	

CONTINUOUS INTEGRATION & DELIVERY

 Continuous Integration	 Enterprise DevOps & Jenkins Solutions	 Open Source DevSecOps Application	 Free your apps. Simplify your ops.
 Innovators in the Open	 Manage Delivery Pipeline with Micro Focus Octane	 App Security & Services from Code to Customer	 Continuous Delivery starts with Continuous Testing

BUILD & TEST

 Enterprise DevOps & Jenkins Solutions	 Turn Outputs into Outcomes	 Open Source DevSecOps Application	 Free your apps. Simplify your ops.
 Innovators in the Open			

DEVSECOPS

SECURITY & COMPLIANCE TOOLS

 Identity Management	 Open Source Container Security Tool	 Full Visibility & Cloud Controls	 Software Compliance Management Solutions
 Identify & Defend Application Vulnerabilities	 DevOps & Application Security	 Enhance & Empower DevSecOps Practices for Hybrid- & Multi-Cloud Orgs	 Leading Platform for Requirements, Risk & Test Management
 Deliver Secure Mobile Apps Faster	 Detection & Protection for Modern Applications	 Development Risk Management	 Manage Secrets & Protect Sensitive Data
 Manage Vulnerabilities, Detect & Respond to Attacks	 Putting the Sec in DevOps	 App Security & Services from Code to Customer	 NSX & Carbon Black
 Actionable, Scalable & Intelligent Infrastructure			

MONITORING

 Free your apps. Simplify your ops.	 App Security & Services from Code to Customer	 Innovators in the Open	 IT Infrastructure Monitoring Solutions
 Enhance & Empower DevSecOps Practices for Hybrid- & Multi-Cloud Orgs	 Identify Vulnerabilities & Block Attacks Inside Applications	 Your Infrastructure, applications, & Clouds. All together now.	 End-to-End Observability for Modern Apps

DEVSECOPS

CERTIFIED KUBERNETES DISTRIBUTIONS

The Kubernetes Platform for Big Ideas

Deploy, Run & Manage Kubernetes

Managed Kubernetes Service

Google Kubernetes Engine

APPLICATION DEPLOYMENT

Red Hat Simple IT Automation

Enterprise DevOps & Jenkins Solutions

Turn Outputs into Outcomes

Open Source DevSecOps Application

Free your apps. Simplify your ops.

App Security & Services from Code to Customer

End-to-End Observability for Modern Apps

CLOUD PROVIDERS

Hybrid Cloud Platform for Modern Apps

Build an End-to-End Continuous Delivery Pipeline

Rapidly & Reliably Build & Deliver Products
