# **Business Applications**

# Feature Experience Parity Exceptions and Roadmap in US Government clouds February, 2025

The deployment of Business Applications in each geography is built on the foundational principles of security, privacy, compliance, transparency, reliability, and in-country disaster recovery, offering organizations a complete cloud infrastructure and platform, as well as familiar productivity and business application tools. This means that customer data is stored at rest within the geography, except as noted in the Trust Center (https://www.microsoft.com/en-us/trust-center/privacy/data-location).

Microsoft strives to maintain functional parity across our localized data center deployments. However, there are exceptions affected by dependent service availability, market priorities, or compliance regulations. These exceptions are indicated through the Product and Feature Availability table below and intended to help customers understand and plan for successful implementation of their business application solutions. Microsoft continues to evaluate these services and capabilities for inclusion and updates in future releases.

A status is provided for each Feature. They include:

Available: This feature is Generally Available in the Geo

Roadmap: This feature is on the product roadmap for deployment into this Geo, but a committed date has not yet been established

Not Available/No Plans: This feature is not on the roadmap and there are no actions underway to evaluate its inclusion for the Geo

Public Preview: This feature is available as a Public Preview feature in the Geo

Private Preview: This feature is available as a Private Preview feature in the Geo

Limited - See Documentation: This feature is available in the Geo, however the documentation explains unique details about its functionality in the Geo

Workaround Available: While the feature, directly, is not available in the Geo, there is a documented workaround to achieve the same or similar functional intent. Please refer to the feature documentation for more information.

Furthermore, to aide in general planning, anticipated availability timeframes are provided wherever possible. They are expressed as **Calendar Year** – Half (e.g. CY22-H1) or **Calendar Year** – Quarter (e.g. CY22-Q3), wherein:

H1: January through June, H2: July through December, Q1: January through March, Q2: April through June, Q3: July through September, Q4: October through December

Please note that these are projections in our roadmap, and subject to change without notice. This information is updated and published every 4-6 weeks and represents our projections at that time. Until a feature is marked as Available, these timeframes are subject to change without prior notice.

For more information about these exceptions, if you have a feature gap to add that you do not see here, if you observe an inaccuracy, or for questions about service availability, please contact your Microsoft representative or Support (https://dynamics.microsoft.com/support).

**CoPilot Capabilities for US Gov Geos:** https://releaseplans.microsoft.com/en-US/availability-reports/?report=copilotproductreport Please contact your Microsoft representative for more information related to the **US Sec** and **US Nat** Geographies.

Change log for this	•Dataverse (Developer) is available in GCC, planned for CY2025-Q1 in GCC High, and planned for CY2025-Q2 in DoD.
nth:	
	Dynamics 365 Sales Enterprise
	Renamed "Deal Manager Workspace (Preview)" to "Opportunity Pipeline View"
	Removed "Sequences / Sequence Reporting"
	Renamed "Sales Accelerator (partial)" with "Sales Accelerator (Sequences)" and is available in GCC, GCC High, and DoD.
	Added "Sales Accelerator (Sequence Analytics)" is not available in GCC, GCC High, and DoD.
	Added "Sales Accelerator (A/B Testing)" is not available in GCC, GCC High, and DoD.
	•Customer Lockbox is available in GCC, GCC High, and DoD.
	•Omnichannel for Customer Service
	Chat is available in GCC, on the roadmap for GCC High, and not available in DoD.
	Digital Messaging is available in GCC, on the roadmap for GCC High, and not available in DoD.
	Voice is on the roadmap for GCC and GCC High, and not available in DoD.
	Self-service Voice Bot / IVR is on the roadmap for GCC and GCC High, and not available in DoD.
	Data Model customization for Analytics is on the roadmap for GCC and GCC High, and not available in DoD.
	Conversation Summary is on the roadmap for GCC and GCC High, and not available in DoD.
	Teams Channel is not available in GCC, GCC High, and DoD.
	Apple Message for Business is not available in GCC, GCC High, and DoD.
	WhatsApp via Azure Communication Services is not available in GCC, GCC High, and DoD.
	Sentiment-based routing is not available in GCC, GCC High, and DoD.
