Breaking Through the Storm of Evolving Threats

In today's unpredictable operational landscape, warfighters face a relentless storm of sophisticated adversaries, rapid technological advances, and global competition. Maintaining superiority in the modern battlespace demands more than sheer force—it requires unrivaled digital dominance and the agility to outpace evolving threats.

Our future operational success depends on the ability to rapidly and securely deliver resilient software capabilities. As competition and conflict extend deeper into the digital domain, outdated tools and processes erode our competitive edge, weaken force readiness, and place warfighters at risk. Operation StormBreaker meets this challenge head-on, equipping warfighters with a modern platform to field mission capabilities at the speed of relevance.

Operation StormBreaker provides a common computing environment for DoD mission owners, offering a full spectrum of commercial cloud services, shared infrastructure, platforms, and active cyber defense. Built for speed, scale, and security, it integrates Zero Trust and modern cloud-native approaches to accelerate mission success in the digital battlespace.

PLATFORM SERVICES

Cloud Native Access Point (CNAP)
Zero Trust access for MCEN users

Cloud Hosting
Host cloud native and legacy workloads

Assessment & Authorization Support
Agile ATO streamlines traditional delivery process

Active Cyber Defense
Continuous Monitoring & CSSP services

SOFTWARE FACTORY

Cloud Developer Environment
Virtual WorkSpaces for engineering

Internal Developer Portal
Remove friction with developer self-service

Continuous Integration & Continuous Delivery (CI/CD)
Assess & incorporate (RAISE Platform)

Mission Control
Central dashboard & build orchestration

Speed of Relevance

Delivery of resilient IT capability to support DoD mission owners

DIGITAL TRANSFORMATION

SIMPLE PAYMENT TERMS

WORKFORCE MODERNIZATION

Supporting Zone C and Production workloads at Impact Levels 2, 4, and 5, StormBreaker ensures secure, mission-ready compute so you can bring the fight to the cloud with confidence.
