Can companies put the SDGs back on track? RepRisk looks at the role of US companies in reaching their SDG goals. In the past year (September 2022 – September 2023), nearly 7,000 US companies were exposed to SDG-related risk, meaning their operations potentially reversed progress toward the SDGs. The most recent ESG risk incident data indicates several goals for which company action could have a major impact, including SDG 3: Good Health and Well-being, SDG 16: Peace, Justice, and Strong Institutions, and SDG 8: Decent Work and Economic Growth.
