Navigate the challenges of hybrid cloud for US government with Datadog

TOP HYBRID CONCERNS

Compliance & Security Assurance

Ensuring uniform security controls & compliance results across on-premises & cloud-based technologies poses a challenge.

Operational Resilience

Interoperability gaps in technology stacks & between infrastructure environments hinder continuity & stability.

Training & Talent Development

Embracing the cloud introduces a demand for new skill sets, often challenging for government entities competing with the private sector.

BENEFITS OF UNIFIED VISIBILITY

Unified Security Oversight

- Security controls are managed centrally & policies are uniformly applied
- Consolidated view of security events & compliance-related metrics
- Faster decisions, backed by full-stack, cross-product data correlation

Increased Visibility & IT Uptime

- Real-time monitoring & alerting capabilities reduce Mean Time to Detection (MTTD) & Mean Time to Resolution (MTTR) to safeguard IT uptime
- Actionable insights allow agencies to optimize technology stacks & improve interoperability

Ease of Use

- Reduced need for expertise in numerous specialized tools
- Troubleshooting, incident response & daily operations are simplified with user-friendly interfaces & automation features

6 Key Features of Datadog for Government

"Datadog gives us confidence that there are no blind spots in our cloud architecture. It's our one-stop shop for observability."

Dr. Patrick Huck
Senior Computer Systems Engineer,
Lawrence Berkeley National Laboratory

01

FedRAMP® authorization for built-in security compliance & adherence to regulatory requirements

02

Unified observability & security platform with full-stack, automatic correlation and more than 700 built-in integrations

03

Integrated, cloud-native security approach for cloud & on-premises monitoring

04

Superior breadth & depth of coverage for maximum visibility & cost control

05

Reliable, performant & available at virtually any scale to optimize uptime and prevent outages

06

Comprehensive adoption & support with a network of cloud providers, MSPs & system integrators

Get Started with Datadog

Begin your journey to unified observability with Datadog

Visit ddog-gov.com/signup & select "get started free" or "free trial"

Choose the region called "United States (US1-FED) - FedRAMP Moderate Authorized" & complete the quick form

LOGGING IN

01

Tell us about your stack

02

Install your first Datadog Agent

03

Start collecting metrics & events from your systems & apps

04

Contact us anytime for support

Let's Connect

Datadog has helped thousands of customers achieve observability across their technology stacks by unifying data from on-premises, hybrid & cloud-based systems into a single source of truth. Contact us to learn more about how we can help advance your mission.
