DOCKET • THE SOFTWARE BUILDER

Production software in days.

Docket is the software builder from Gridlight's Software Factory. Docket's agents design, build, test, validate, and can even deploy your applications against a written definition. Your software arrives in days, costs less than a conventional build, and is exactly what you asked for. You own the code at the completion.

01 • SPEED

Days, not months

Agents work in parallel, around the clock. Screens and code start as soon as the definition is agreed.

02 • COST

Judgment, not hours

People make every decision. Agents augment the team and expedite the work, so you pay for judgment, not hours.

03 • ACCURACY

Built to what you asked for

Every requirement is written down before the build starts, and every one is offered back to you to judge. Fast does not mean guessed.

TWO WAYS IN A new application, or the one you already have

GREENFIELD

Start from scratch

Describe what you need. Docket interviews you, writes the definition and draws every screen. Agents build it, and production software follows in days.

BROWNFIELD

Start from what you have

Point Docket at an existing application. It reads the code and writes down what the application does today. New features and changes then follow the same path.

01

Define

Docket drafts the definition from a conversation, or from your code.

02

Agree

One of your people countersigns a numbered version.

03

Design

Every screen is drawn before any code. Ask and it is redrawn.

04

Build

Agents build and test it, with our architects on the plan.

05

Judge

You judge each requirement. Then it ships.

OWNERSHIP

You own the code

YOURS

The source, its history and the right to change it, host it or hand it to another team.

NO LOCK-IN

The application runs without Docket. No licence is needed to keep it running.

DEPLOYMENT

It runs where your data must

HOSTED

Docket in our cloud. Agent work runs on one machine at your site, outbound only.

ON-PREMISES

The whole stack on your hardware, models included. For data that cannot leave.

Bring one application you need.

New or existing. We define it with you in Docket, you see it drawn before the build starts, and you own what we deliver.
