Vessel Smart Assessments™

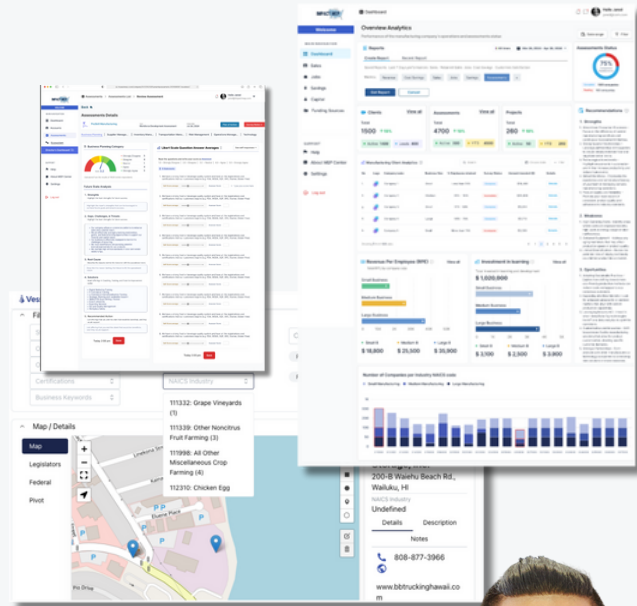

The Vessel Smart Assessment Platform (VSAP) is an AI-enhanced assessment and client management solution tailored for manufacturing consulting organizations.

Automated assessments, AI-driven recommendations, and dynamic reporting empowers an organization to efficiently deliver precise and actionable insights both immediately and over time.

Key Benefits:

- Custom branded comprehensive surveys, evaluations, assessments & self-assessments
- Library of SME created assessment types (General, Workforce, Supply Chain, Technology, More...)
- Reduce assessment time from 25+ hours to minutes
- Condensing the need for 5 tools into 1 – all in one place
- Improve client engagement with dynamic reports & analytics
- Smart matching recommendations aligns businesses with projects, expertise, funding, training, & resources
- Assessment & Supply Chain Data Intelligence & Visualization System (VSCIS)
- Conversion increased from recommendation to project
- Seamless CRM & other integrations

- » Automated Assessments
- » Dynamic Client Reports
- » Smart Matching Technology
- » Real-Time Dashboards
- » Assessment, Supplier & Partner Data Intel (VSCIS)
- » Seamless CRM Integrations
- » Automated Follow-Ups

"The Vessel team has been an integral partner to TechHelp. We have partnered with them on several projects, including a supplier scouting review, and they have always gone above and beyond with the quality of their work."
Steve Hatten - Executive Director of TechHelp

Vessel

Vessel is a Veteran-owned, mission-driven company dedicated to reshoring and strengthening the resilience of U.S. manufacturing. At the core of Vessel is a custom-built technology, specifically designed to deliver measurable economic impact for private, state, and federal agencies that consult or advise underserved U.S. manufacturers.

Vessel is a Veteran-owned, mission-driven software company dedicated to reshoring and strengthening the resilience of U.S. manufacturing. At the core of Vessel is a custom-built technology, specifically designed to deliver measurable economic impact for private, local, state, and federal agencies that consult or advise underserved U.S. manufacturers. The Vessel Smart Assessment Platform (VSAP) enhances agency effectiveness by providing more accurate recommendations, fostering sustainable relationships, and enabling ongoing engagement through a customized evergreen approach. The technology integrates industry-specific, geography-based, size-based, and topical manufacturing assessments with AI-matched agency resources, partners, and external supply chain data points for real-time data extraction, processing, and analysis capabilities to quickly identify operational trends and anomalies. This tailored matching system ensures that the unique needs of each manufacturer are met with precision.

CAPABILITIES:

Vessel Smart Assessment Platform (VSAP):

AI-powered platform autonomously conducts precise risk/opportunity assessments with real-time data processing, predictive analytics, and enhanced entity disambiguation, supporting dynamic operational decision-making.

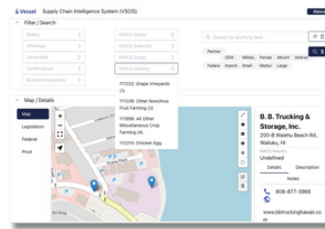

Vessel Smart Assessments (VSA):

VSA streamlines customizable manufacturing assessments (e.g., General, Workforce, Supply Chain, Technology), quickly pinpointing strengths and improvement areas. With automated scoring, intuitive dynamic reports, and clear benchmarking, organizations swiftly prioritize actions to achieve sustained operational growth.

Vessel Supply Chain Intelligence System (VSCIS):

Centralizes, integrates, and optimizes complex assessment, survey and supply chain data into scalable, real-time dashboards powered by advanced knowledge graph refactoring and predictive modeling.

Seamless Integration & Scalability: Compatible and scalable integration with government databases, defense infrastructures, CRMs, and existing knowledge management systems, ensuring operational integrity, enhanced data accuracy, and interoperability.

KEY BENEFITS:

- Custom-branded surveys, assessments, and self-assessments
- Extensive SME assessment library (General, Workforce, Supply Chain, Tech, etc.)
- Reduce assessment time from 25+ hours to minutes
- Consolidates an average of five+ tools into one integrated platform
- Engaging dynamic reports with benchmarking & advanced data visualization
- AI-driven recommendations aligned with funding, training, and project needs
- Supply Chain Intelligence Platform (VSCIS) with real-time analytics and visualization
- Scalable integration with CRM systems, DoD databases, and secure infrastructures
