SILOBREAKER

Intelligence for people who think.

Company Overview

Silobreaker is an intelligence engine that cuts through complexity, producing decision-grade insight so organizations can see clearly, act with confidence, and influence the outcomes that matter.

Silobreaker transforms the work of intelligence teams.

Unified data

Built for all types of data, Silobreaker ingests open-source, dark web, specialist vendor, and internal sources, into a single structured environment. High-volume information is transformed into precise, relevant intelligence aligned to your organization's risk landscape.

AI-enabled analytics

Silobreaker enables teams to search, analyse and investigate results in customizable workspaces – exploring related data, detect change, and uncover relationships. AI is built-in and applied with intent, accelerating output while reinforcing human judgement.

“Silobreaker has transformed how quickly and consistently we can turn intelligence into something stakeholders can actually use. The time savings are significant, but more importantly, we're focused on the threats that truly matter to our business.”

— Michael Francesc, Director, Cybersecurity Advanced Threat, Wyndham

Analyst-led workflows

Silobreaker embeds Priority Intelligence Requirements (PIRs) into daily workflows, aligning intelligence activity to real business risk. Analysts direct collection and analysis with purpose - spending less time reacting and more time delivering outputs leaders trust.

Key benefits

- Produce higher-quality intelligence with confidence
- Connect cyber, geopolitical, and physical risk domains
- Highlight critical signals and reduce noise
- Reinforce analyst judgment with structured context
- Deliver clear outputs leaders rely on
- Embed intelligence into your operational systems

“Silobreaker has made a huge difference both in time saved and in the quality of our reporting. We've gone from 15 hours a week writing updates to about one hour, and the intelligence we share is more relevant, timely and widely used.”

— IT Services Lead, Large Government Department

Silobreaker operationalizes intelligence from requirement, to delivery in a single environment.

1. Define and manage PIRs	2. Context built-in	3. Analyze with clarity	4. Deliver with impact
Establish and manage PIRs. Align intelligence activity to evolving stakeholder needs through measurable workflows.	Normalize and enrich content using a multi-domain ontology of entities, relationships, translations, and classifications - enabling precise search and defensible analysis.	Investigate and prioritize findings in customizable analytical workspaces. Combine expert assessment, trusted sources, and transparent AI support to clarify material risk.	Produce clear intelligence products supported by evidence and context. Deliver alerts and reports - automated or human-reviewed, with full oversight.

Pure SaaS deployment

Silobreaker is a secure, scalable SaaS platform designed for enterprise intelligence teams. Rapid deployment, lower upfront costs, and simplified management reduce operational burden while supporting resilient intelligence operations.

Integrations that strengthen your intelligence

Connect your existing feeds and security stack seamlessly. Deliver alerts and reports via ticketing or APIs - unifying trusted intelligence into a single searchable platform. Silobreaker supports MCP, enabling secure integration with AI applications and direct querying of your intelligence environment.

Silobreaker AI

Silobreaker AI accelerates triage, extraction, and reporting - delivering 40%+ time savings while keeping outputs grounded in your environment. Insights remain context-aware, aligned to stakeholder needs, and designed to strengthen analyst judgment.

From onboarding to impact

Our Customer Success teams work alongside you to accelerate adoption and maximize value. Through structured onboarding and tailored guidance, we ensure the platform aligns to your priorities and delivers measurable results from day one.

About Silobreaker

Silobreaker is an AI-native intelligence platform that unifies data, advanced analytics and human expertise to deliver high-quality insights where it matters most. Designed for security, threat and risk teams, the Silobreaker proprietary intelligence engine automates the collection, fusion and analysis of cyber, geopolitical and physical data. With PIR-driven workflows, agentic automation and executive-ready reporting, Silobreaker helps global enterprises and governments anticipate threats, accelerate decisions, protect their people, operations and assets, and build resilience with confidence.
