END-OF-LIFE DEVICE MANAGEMENT

Intratem's End-of-Life Device Management delivers secure, efficient, and compliant retirement of mobile devices. We assist in lock removal, handle data wiping, value recovery, and recycling — helping you reduce risk, recover value, and meet ESG goals.

Secure, Sustainable, and Strategic Mobility Asset Recovery

Maximize value, minimize risk, and meet ESG goals through a secure, streamlined electronics recovery and retirement process.

Don't Let Old Devices Become a Liability

- > Rapid and consistent device testing and grading
- > On-demand, transparent fair market value assessments (A-F graded)
- > Fast processing to maintain asset value

Accelerating Value Recovery

Devices lose value with time — and during product refresh cycles, that drop can be steep. Intratem accelerates every phase of recovery, ensuring devices are processed and settled within 5-10 days, minimizing loss and delay.

Logistics

We provide packing materials, prepaid shipping labels, and step-by-step guidance to safely prepare devices for transit—reducing your logistical burden.

Data Security and Lock Removal

Every device is wiped using NIST-compliant software, backed by certified reports. We assist in identifying and resolving:

- > MDM locks
- > iCloud/Activation locks
- > Google FRP and other OEM restrictions

Devices undergo a detailed 15-point inspection to verify functionality and ensure full compliance with retirement standards.

Processing facilities are certified to the R2v3 recycling standard, as well as ISO 9001, ISO 14001, and ISO 45001—ensuring security, quality management, and environmental responsibility at every step.

Responsible E-Waste Disposal

Devices deemed unusable are responsibly recycled in full compliance with R2v3 and environmental best practices.

We ensure secure, documented destruction of e-waste in accordance with all local and federal regulations.

Support Your ESG Goals

Nearly 80% of a device's lifecycle emissions come from manufacturing. By extending the lifespan of devices through responsible recovery, you reduce unnecessary production and lower your environmental footprint.

IntrateM delivers documentation to support your emissions avoidance efforts for ESG reporting.

Expertise You Can Trust

With over 20 years of experience managing enterprise mobility, IntrateM ensures your end-of-life device handling is efficient, secure, and aligned with your business goals — whether as part of routine upgrades or special initiatives.

Our solutions are trusted by commercial enterprises and public sector organizations alike.
