# ZERO TRUST - Never Trust, Always Verify

## VERITAS™

### Implement Zero Trust Into Your Organization!

- Segment and micro-segment your network
- Implement access management
- Secure applications with air-gaps and Isolated Recovery Environments (IRE)
- Monitor your network, devices, and data
- Audit systems and test your recovery strategy

### Why Zero Trust?

Your data needs to be secure. But your backups need to be even more resilient. Veritas provides solutions for every step of your data protection and backup infrastructure, ensuring that your data is available, mobile, and reliable.

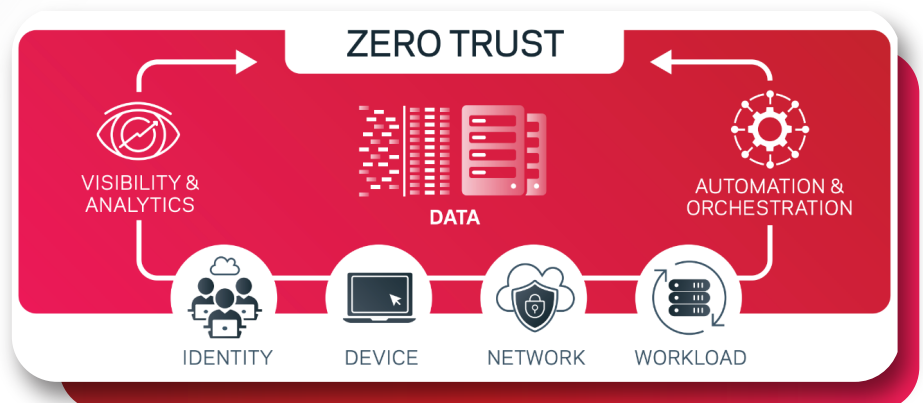

### Zero Trust is Not a Single Solution

Rather, it is a proactive approach where security verification and access management helps to reduce attack surface and data security. When your data security works with your data protection and your data governance, you create a true 360 Defense.

### The Ultimate Resiliency is Recovery

If disaster strikes, you need to know you can recover. Veritas can mitigate risks in data security, provide immutable backups, and an orchestrated and validated recovery plan. When you can recover confidently at scale, with Veritas, you are truly resilient.

Carahsoft is Veritas' Public Sector distributor, we hold variety of government contracts which can help streamline the procurement process for public sector agencies who wish to leverage Veritas Solutions. Veritas will work with Carahsoft, The Trusted Government IT Solutions Provider®, and its resellers to enable agencies to quickly obtain and implement Veritas' technology to guarantee their data's protection & compliance.

# Zero Trust in Action - Repeatable and Reliable Solutions

Veritas fully embraces a Zero Trust mindset in all of its data security solutions. From Data Protection to Application Resiliency, Veritas has a secure and reliable solution to meet your data security needs.

## Data Protection

**One-Click Recovery** - Automate and orchestrate a complete cross-site or cloud restoration with the click of a button

**Rapidly Recovery** - Recovery can be infinitely scaled

**Accessible and Reliable** - Data is accessible and applications are online with all necessary dependencies

**Only Veritas can send and store deduplicated data on Object Lock technologies, and spin up an entire data center on demand**

## Data Governance & Compliance

**Data Governance** - Uncover, classify, and secure data with precision, eliminating dark data, ROT, and vulnerabilities.

**Defensible Deletion** - Automate secure data disposal, ensuring compliance with retention regulations through transparent accountability.

**Communication Surveillance** - Ethical communication oversight, venue-aware surveillance, and anomaly detection for proactive risk mitigation among employees.

**Threat Detection and Response** - Proactive eDiscovery, intelligent data classification, and threat management with intelligent data categorization for defense.

**End-to-End Compliance Management** - Immutable, cost-effective archiving ensures secure, unaltered storage for legal and regulatory adherence.

## IT Analytics

**Risk Mitigation Analysis** - Display an interactive chart of risk categories to identify opportunities for risk mitigation.

**Risk Mitigation Trends** - See trends over time, allowing administrators to uncover risk-prone areas within the enterprise that may be in danger of failing.

**Dashboards and Alerts** - Out-of-the-box ransomware and risk assessment dashboards to provide actionable alerts to your team.
