Government

Digital interconnection for Equinix Government Solutions (EGS)

Securely managed, global and multipoint
services that shorten the path to reliable
connectivity and ecosystem access

Data Sheet

Unlock new levels of efficiency and collaboration with tailored solutions that combine robust security protocols with global connectivity and accessibility—so mission-critical operations run uninterrupted.

With a focus on empowering agencies to thrive in today's interconnected world, we offer dedicated program management, round-the-clock support and the ability to connect seamlessly with digital resources—from partners to stakeholders to clouds, networks and more.

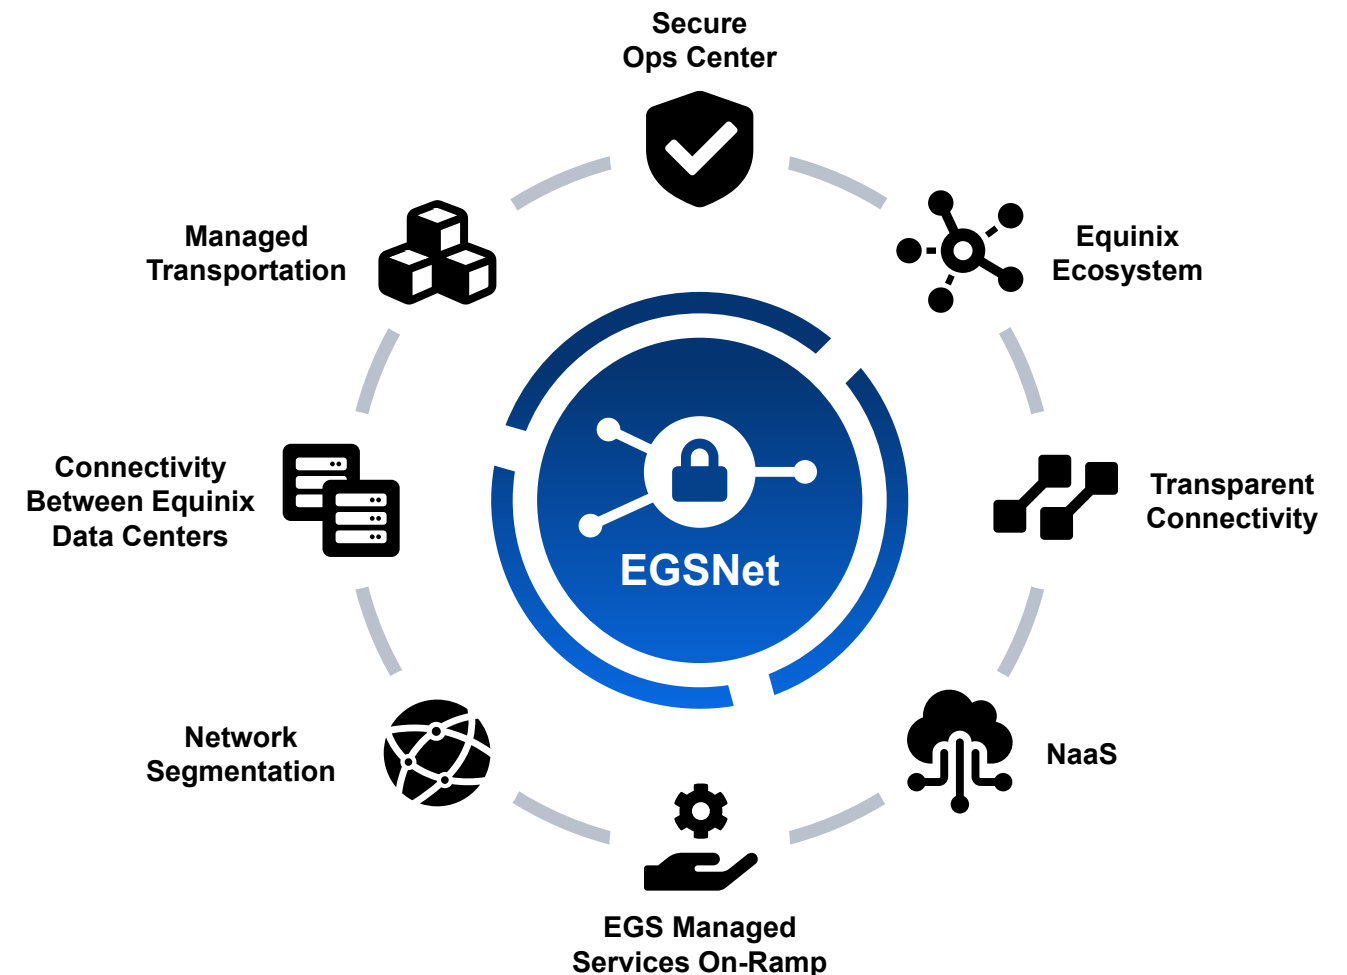

Strategic digital integration with EGS

Reliable services for the public sector

Facilitated by two distinct Equinix product offerings—Managed Connectivity Services and EGSNet—EGS Managed Services provides federal, state and local administration agencies and customers with end-to-end customized solutions, uniquely tailored for the needs and requirements of our customer base.

EGS Managed Connectivity Services

EGS Managed Connectivity Services facilitates connectivity to EGSNet and the wider Equinix marketplace by utilizing a combination of internal and external vendor services to customize accessibility for customer premises networks.

1

Benefits

Partnership

Fully managed customer requirements, supported by dedicated program management, engineering and 24/7 Secure Network Operations Center (SecNOC) personnel.

Reach

A private network overlay utilizing Equinix to reach thousands of customers, partners and services across 76 key markets in 36 countries.

Reliability

Mission system integrity achieved via strategic availability, resiliency and diversity partnerships.

Flexibility

Streamlined technologies to facilitate enhanced network delivery capabilities, allowing for flexible service architectures.

Security

Private service delivery operated by government-cleared personnel.

Service offerings

EGSNet offers three service levels to choose from.

Multitenant

Leverages a shared network infrastructure (on-ramp and backbone) to securely manage and deliver customer traffic to the global marketplace.

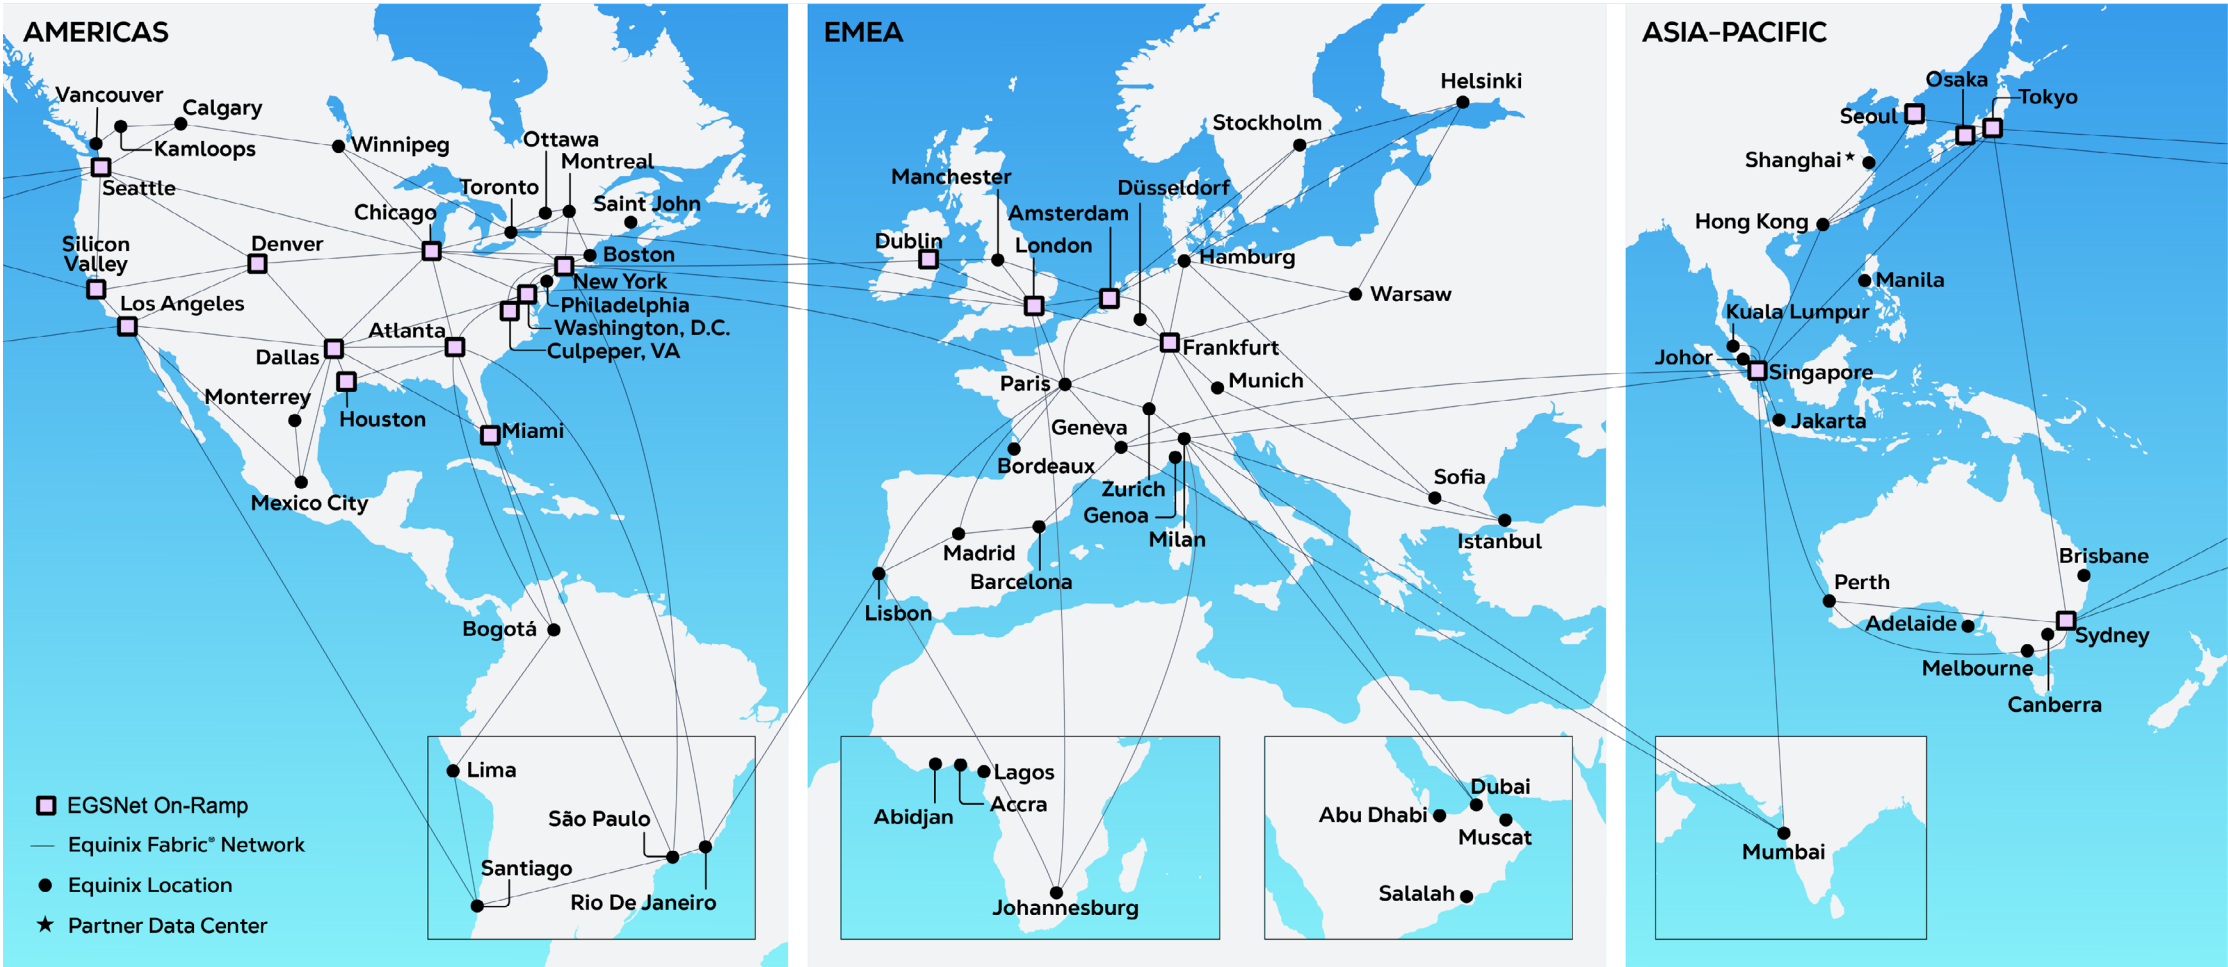

Enclave

Implements the EGSNet Multitenant shared on-ramp infrastructure to establish a dedicated core network solution over Equinix Fabric®.

Dedicated

Provides an isolated ESGNet on-ramp and core network design via an exclusive single-tenant solution.
