

Ripcord Offer to US Federal Government Purchase Guide

To receive pricing and/or to schedule an overview reach out to:
Ripcord@carahsoft.com or (571) 662-3150

Ripcord combines AI-powered robotic digitization, document intelligence, and cloud-based content management to turn physical and digital records into secure, searchable, actionable information. From high-volume digitization and automated data extraction to cloud-based content management with Canopy, Ripcord helps federal agencies modernize legacy records, unlock information trapped in paper and unstructured content, and build the data foundation needed for AI.

Ripcord helps agencies maximize the value of Fiscal Year-End funding by accelerating records modernization and reducing the operational burden of managing paper and unstructured information. By digitizing records at scale, applying intelligence to the resulting content, and making it accessible within a secure cloud environment, agencies can reduce manual processes, improve access to mission-critical information, and create a more efficient, modern approach to records management.

Products	Capabilities
Robotic Digitization	• Digitize at scale in a fraction of the time with Ripcord’s proprietary robotics, accelerating high-volume records modernization projects. • Reduce costs and manual effort by automating document preparation and scanning processes. • Modernize and preserve legacy records by transforming paper archives and physical assets into high-quality, secure digital files.
Intelligent Document Processing	• Achieve over 99% accurate data extraction and classification using AI-powered OCR, machine learning, and document intelligence. • Reduce manual data entry and document review by auto-classifying documents and extracting valuable information from unstructured content. • Transform records into structured, actionable data that can be searched, analyzed, and integrated into agency workflows. • Accelerate AI and automation initiatives by making information easier to access, process, and use at scale.
Canopy Content Management Platform	• Access information faster with secure, cloud-based access to digitized records and content. • Reduce reliance on physical storage by centralizing digital information in a scalable cloud-based environment. • Find and retrieve content easily with search capabilities designed to make large volumes of information more accessible. • Connect content to modern workflows by providing a centralized foundation for records management, automation, and AI initiatives. <i>*Receive a complimentary Canopy subscription with a qualifying Ripcord purchase through September 30, 2026.</i>

Frequently Asked Questions

Where to Purchase:

The promotion is available exclusively through Carahsoft.
