Products

Plauti

SALESFORCE ISV

Plauti solutions ensure your records are deduplicated, formatted, and validated in Salesforce, truly enabling a single customer view. Good quality data leads to better Salesforce adoption, cost savings, better compliance, and user experience for both citizens and staff.

All Plauti solutions are Salesforce native, ensuring data security, easy implementation, and fast adoption by your team. Plauti has been a Salesforce ISV partner for more than ten years and has extensive experience working with (semi)governments, including some COVID-19 related projects. All Plauti solutions are large data volume proof, flexible and extensible, and native Salesforce.

- Duplicate Check
- Record Validation
- Plauti Data Management

Products

ProvenWorks

SALESFORCE ISV

The ProvenWorks story starts in 2008, with a passionate team who share the belief that good data is the basis of success. This means correct data at the point of entry, and where that's not possible, it means having the ability to highlight and intelligently cleanse poor data. Fast forward to now and over a decade of experience as a Salesforce.com ISV partner. We deliver quality cloud applications for Salesforce with exemplary customer support. Based in Reading near London, we're in the heart of the UK's silicon valley. We have a strong relationship with the University of Reading and plenty of us are proud to call it our alma mater!

- Simple Import
- Address Tools
- Phone Tools
- Industry Complete

Products

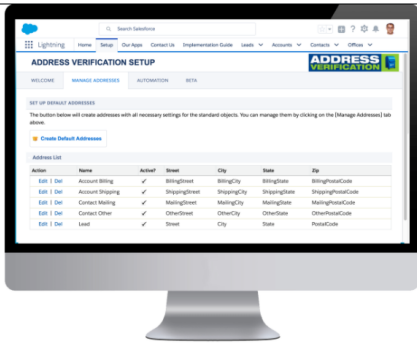

To A Finish

SALESFORCE ISV

Features a very simple way to cleanse addresses within your Salesforce CRM or Force.com system. With the touch of a button, addresses on the current record are verified and cleansed. Works in standard or custom objects.

Address Cleansing service and provides buttons on the Account, Contact and Lead layouts which instantly verify and cleanse the standard addresses. Easy instructions for adding buttons for custom objects and/or addresses are provided.

Return statuses are included, along with demographic data. e.g. Latitude & Longitude, County Name, FIPs Code, and more.

- Address Verification
- Simple Signature
- List Browse
- Highlighter
