

Which Tablet is Right For Your Public Safety Agency?

When you put everything on the line, you need a tablet that's ready for the mission. Built for the most unforgiving roles and environments, Zebra tablets can endure hazardous conditions, accidental drops, exposure to water, dust, dirt and more. But toughness is just the starting point. These powerful and smart tablets are tailored to your way of working, enabling you to set a higher standard every second of every day. Certified on public safety networks, Zebra tablets connect first responders and emergency management personnel with each other and the critical data they need. Our L10 Series and ET85 rugged tablets are presented here in three popular configurations for Public Safety—Standard, Select and Premium—offering a range of form factors, capabilities and prices to fit virtually any agency's needs and budget.

IT'S ALL ABOUT THE MISSION:

Flexible Configurations

You can choose the level of durability, display size, form factor, operating system, processing power, accessories and options to create a solution that's perfectly matched to whatever your workday requires. Get maximum portability with the L10, a versatile rugged tablet platform, available in Windows or Android. The ET85 is a large screen rugged Windows tablet under 3 pounds, and can be used as both a standalone tablet and a true laptop replacement.

Versatile Accessories

Customize your tablet with a broad range of accessories. Our innovative docking solutions create a complete mobile or office workstation—workers can dock and undock a tablet in seconds, so it's always where it needs to be. Batteries and vehicle adapters keep tablets operating around the clock. Keyboards and other input devices streamline data entry. And carrying cases, handles and hand straps enhance portability, making life easier out in the field.

Advanced Security Protections

Zebra's rugged tablets are protected by government-level security to provide your agency with the visibility, control and security you need to manage and ensure readiness and uptime. Our tablets comply with FIPS 140-2 and support multi-factor authentication options with Windows Hello facial recognition, CAC Smart Card readers and fingerprint readers. And Zebra's Mobility Extensions (Mx) help fortify Android with additional security and manageability features.

Rugged Reliability

No matter how harsh the conditions that your front-line personnel face, Zebra's rugged tablets have seen worse. The L10 Series and ET85 tablets are built to the latest rugged military standards. Drop them. Get them wet. Use them in extreme heat and subzero cold, inside a truck, car or boat or even in the saddlebag of a horse or motorcycle. Zebra tablets are built to handle it all.

Service and Support

Protect your tablet investment, get peak performance and maximize uptime with Zebra OneCare™ maintenance plans. Available in 3- or 5-year plans, Zebra OneCare covers everything from normal wear and tear to accidental damage. Our plans eliminate unexpected disruptions and unbudgeted repair expenses and give you access to unmatched repair and support from Zebra experts. Rest assured, if it's broken, we'll fix it.

Preserving the Integrity of Your Data

At Zebra, we understand the importance of keeping the sensitive data on your tablets secure. That's where Zebra's OneCare maintenance plans can help. If you experience a problem with a hard drive, Zebra can send you a replacement upon request. You keep the old drive and maintain complete control of your confidential information—it never leaves your possession.

L10ax Rugged Tablets/Windows

The L10ax platform sets the standard for rugged tablets. Rated for a 6 ft. drop, the L10ax complies with MIL-STD-810H and maintains its IP65 rating even with the port doors open. The tablet can be used in cold storage, blowing dust or driving rain. With sunlight viewable reinforced glass displays and an active digitizer option, your screen will be easy to read wherever you use it.

Value-add Zebra-only Software Tools

With the L10ax Windows tablets, you get all the security, manageability and compatibility of Windows, with the added value of select Zebra software tools. With PowerPrecision+ batteries, workers can monitor battery health right on the tablet. With Workforce Connect, you can easily deploy enterprise-class PTT and secure text messaging. And 123Scan makes it easy to configure the optional scanner and format barcode data for your application.

L10 Rugged IP-Rated Companion Keyboard

Keyboard Part Number: 420095
KickStrap Part Number: 410055

The backlit IP65 keyboard with KickStrap/Stand offers a laptop/tablet experience so users can realize both the mobility of a tablet and notebook-style support for data-intensive tasks.

Universal Docking Solution

With a single universal dock, the ET85 Rugged 2-in-1 Tablet transforms into a desktop computer in the office or a mobile workstation in a truck. The simplified docking experience lets workers dock and undock in seconds. And since the ET85 is more than 35% thinner than other major 2-in-1 competitors with the same screen size, its low profile improves driver visibility and safety.

Value-add Zebra-only Software

With the ET85, you get all the security, manageability and compatibility of Windows, with the added value of select Zebra software tools. With PowerPrecision+ batteries, workers can monitor battery health right on the tablet. With Workforce Connect, you can easily deploy enterprise-class PTT and secure text messaging. And 123Scan makes it easy to configure the optional scanner and format barcode data for your application.

ET85 Rugged Friction Hinge Keyboard

Keyboard Part Number:
KYB-ET8X-2IN1-US-01

Go from tablet to laptop and back in seconds by simply attaching and detaching the rugged keyboard. The friction hinge provides a natural laptop-like experience, allowing the screen to be placed at most any angle.
