

Solutions for Government

MuleSoft's Anypoint Platform Powers Digital Transformation in the Federal Government

Solutions for Government

New technologies and executive mandates have raised expectations for government service and engagement. However, federal government IT organizations face unique challenges in meeting these demands. Agencies require connectivity solutions span across legacy and cloud applications while balancing agility with robust security and governance. MuleSoft's Anypoint Platform uniquely addresses the challenges faced by government agencies with a FedRAMP authorized platform that empowers IT to rapidly design, develop, and manage APIs and integrations on-premises or in the cloud.

"We rely on Anypoint Platform for modernizing our legacy initiatives. As we continue to scale, we see MuleSoft as a significant contributor to our ongoing priority projects."

Federal Civilian Agency

MuleSoft's Anypoint Platform Powers Digital Transformation in the Federal Government

Modernize legacy systems

Support the adoption of cost and time-saving new technologies

A civilian agency recognized a 90% time savings in new system provisioning and reduced reporting preparation time by 67% by leveraging MuleSoft to modernize legacy systems.

Support Open Government

Re-imagine services and delivery channels to support constituent needs

A highly public-facing civilian agency uses MuleSoft's Anypoint Platform to standardize the API creation process and govern access to public APIs, helping them deliver on their commitment to open government.

Develop transformative services

Leverage government scale to maximize value from cloud, mobile, and IoT

A civilian agency responsible for processing over 6 million applications a year uses MuleSoft as the integration engine to power an automated system to drive down processing time and costs.
