ArmorxAI

DATA SHEET

ARMOXAI DIRECTOR

Prevent ransomware before it strikes

Centralized Command and Control.

The Ransomware Challenge

In today's hyper-connected world, ransomware has evolved into a sophisticated and pervasive threat, capable of crippling critical infrastructure and exfiltrating sensitive data. The stakes are higher than ever, demanding a new paradigm in ransomware defense.

ArmorxAI is a cutting-edge anti-ransomware solution that detects ransomware threats in real-time and inoculates or isolates affected devices. *ArmorxAI Director* provides security teams with a *powerful intuitive interface and insightful dashboards,* that streamline the complexities of *RansomArmor* agent management across the entire organization.

KEY FEATURES

- **Single Dashboard**
  Intuitive dashboard providing visibility and control of all assets.
- **Security Policies**
  Default security policies to protect all assets.
- **Real-Time Monitoring**
  24/7 surveillance for detecting known and zero-day ransomware threats on all devices.
- **Effortless Integration**
  Seamlessly works alongside existing Security Information Event Management (SIEM) solutions for additional visibility.
- **Multi-tenanted Environments**
  Delivered either as a Multi-tenant SaaS instance, or as a dedicated on-premise instance, or public cloud instance.

ARMOXAI DIRECTOR BENEFITS

- **Intuitive Dashboard**
  Visualizes security data with real-time insights for smarter decision-making.
- **Real-Time Monitoring**
  ***Monitors** ransomware threats continuously from all assets.*
- **SIEM Integration**
  Seamlessly integrates with SIEM tools for enhanced threat visibility and analysis.
- **Customizable Security Policies**
  Offers flexible security rules tailored to specific organizational needs and risk levels.

HOW IT WORKS

Provides enterprise-grade ransomware defense, visibility and control for Windows Endpoints and Windows Servers.
